FOI - 7859 - Myocarditis & Pericarditis Attendances to MKUH A&E Department

Questions	Notes/Comments	Calendar Year	Myocarditis		Pericarditis	
			Number of attendances	Percentage of total attendances	Number of attendances	Percentage of total attendances
1. Could you please provide the annual prevalence of emergency attendances at Milton Keynes University Hospital, for both Myocarditis & Pericarditis from 2018 to 2022.	<p>Detailed are the number of attendances to Milton Keynes University Hospital's A&E department between 18th May 2018 and 31st December 2022, where the attendance had a diagnosis of either 'Pericarditis' or 'Myocarditis' assigned to it. This has also been compared to the total number of attendances for the same time frame to provide the percentage of attendances that were for Myocarditis or Pericarditis.</p> <p>We are unable to provide any data prior to 18th May 2018 as the presenting complaint/diagnosis was recorded as a free text field and can therefore not be used to get reliable and accurate data. After 18th May 2018, specific presenting complaint/diagnosis codes are used, making the data more reliable.</p>	2018 (from 18th May 2018)	13	0.02%	15	0.03%
		2019	14	0.02%	39	0.04%
		2020	4	0.01%	20	0.03%
		2021	15	0.02%	18	0.02%
		2022	13	0.01%	34	0.03%
