BOARD OF DIRECTORS MEETING

Minutes of the Trust Board of Directors Meeting in Public
held on Thursday, 9 March 2023 at 10.00 hours in the Academic Centre, Milton Keynes University Hospital Campus and via Teams

Present:

Alison Davis	Chair	(AD)
Professor Joe Harrison	Chief Executive Officer	(JH)
Heidi Travis	Non-Executive Director / Senior Independent Director	(HT)
Haider Husain	Non-Executive Director	(HH)
Bev Messinger	Non-Executive Director	(BM)
Dr Dev Ahuja	Non-Executive Director	(DA)
Mark Versallion	Non-Executive Director	(MV)
John Blakesley	Deputy Chief Executive	(JB)
Dr Ian Reckless	Medical Director & Deputy Chief Executive	(IR)
Danielle Petch	Director of Workforce	(DP)
Yvonne Christley (left at 10:45)	Director of Patient Care and Chief Nurse	(YC)
Emma Livesley	Director of Operations	(EL)
Terry Whittle	Director of Finance	(TW)

In Attendance:

Kate Jarman	Director of Corporate Affairs	(KJ)
Jason Sinclair	Associate Non-Executive Director	(JS)
Ganesh Baliah	Associate Non-Executive Director	(GB)
Louise Clayton	Deputy Director of Workforce	(LC)
Sharon Robertson (Item 3)	Matron, Patient & Family Experience	(SR)
Melissa Davies (Items 10 and 14)	Head of Midwifery, Gynaecology & Paediatrics (For Item 12)	(MD)
Kwame Mensa-Bonsu	Trust Secretary	(KMB)
Julia Price	Senior Corporate Governance Officer	(JP)

1 Welcome and Apologies

- 1.1 AD welcomed all present to the meeting. There were apologies from Gary Marven (Non-Executive Director) and Precious Zumbika-Lwanga (Associate Non-Executive Director)

2 Declarations of interest

- 2.1 There were no declarations of interest in relation to the agenda items.

3 Patient Story

- 3.1 SR introduced herself and explained that in addition to her role as the Matron for Patient and Family Experience, she was currently covering the vacant role of Learning Disability Nurse. SR advised that the patient at the centre of this story would have liked to attend the meeting in person to talk to the Board but had not felt able to. SR gave the background to the patient, explaining that he was due to undergo an operation but, in the event, came to hospital as an emergency. During his stay, he was looked after on Same Day Emergency Care, Ward 21B and Ward 20. As he was a patient with learning disabilities, SR was pleased to see that staff on Ward 21B had made reasonable adjustments for him to enable his carers to visit him as required. SR helped him make a phone call to the manager of his residential home and afterwards he told her that he wished he had asked her to bring in his teddy bear. SR was able to obtain one for him from staff in Paediatrics who wrapped a bandage around the teddy's middle to mirror the operation the patient would be having. SR was able to prepare the patient for his surgery and explain that there was a possibility the operation could be delayed. This was the case and the patient adapted

very well. He developed a very good relationship with one of the healthcare assistants who took him to theatre and waited with him in Recovery. The patient named his teddy bear, Tim, after the anaesthetist who had taken such good care of him. The patient made a good recovery and was well supported by physiotherapists. He described his care as 'really, really good'.

- 3.2 SR described the role of the learning disability nursing which involved effective communication using appreciative inquiry techniques, working closely with patients, their carers and families, some of whom had been involved in codesigning the learning disability symbol used as a visual aid to ward staff, when looking after a patient with learning disabilities.
- 3.3 She explained that the Trust had worked closely with job coaches from MacIntyre and Talkback and had successfully recruited three people with learning disabilities as volunteers. It was hoped that their experience as volunteers would lead to paid employment in the future.
- 3.4 Improvement following the Learning Disability Standards NHSE Benchmarking included better collaboration with local care homes and getting to know patients in their own environment to improve their inpatient experience and flexible and inclusive visiting for families and carers. Ongoing work involved training for all staff including videos of what matters to patients, recruiting a learning disabilities nurse and including people with learning disabilities on the recruitment panel, creating pathways for scheduled and unscheduled care and improving written communication and signage for patients with a learning disability, such as easy read appointment letters.
- 3.5 HH asked SR about links between the hospital and the community and how these were maintained. In response, SR explained that good relations with the Learning Disabilities Community Team were being developed. There were also good links being forged with care homes, managers and carers to gain a better understanding of their residents. SR added that care home staff were amazing advocates for their residents as inpatients, for example, supporting with feeding. SR confirmed that communication with these teams was generally verbal in nature.
- 3.6 On behalf of the Board, AD thanked SR for the work undertaken and her presentation.

4 Minutes of the Trust Board Meeting in Public held on 03 November 2022

- 4.1 The minutes of the Trust Board Meeting in Public held on 12 January 2023 were reviewed and **approved** by the Board.

5 Matters Arising

- 5.1 The due actions on the log were reviewed as follows.

Action 24 – Review of risk report front sheet

This action would be progressed after the review of the Trust's Risk Appetite Statement. KJ and KMB would ensure that this was discussed at a future Board Seminar. **Open**

Action 25 – Effectiveness on patients of the meaningful activities facilitator role

A paper had been circulated to Board members prior to the meeting. **Closed**

Action 26 – Workforce Report to include additional data

DP advised that the data requested at the last Board was now included in the Workforce Report (Item 13) and had been reviewed at Workforce Committee. **Closed.**

There were no other matters arising.

6 Chair's Report

- 6.1 AD presented the Chair's Report and advised that she had participated in a meeting with the Chief Midwife for the NHS and colleagues, reviewing the local maternity improvement plan. She highlighted the huge amount of work going on within Maternity, covered under Items 10, 14 and 15. She had also chaired the Inclusion Leadership Council and would feed back on that under Item 15.
- 6.2 The Board **noted** the Chair's Report.

7 Chief Executive's Report – Overview of Activity and Developments

- 7.1 JH asked IR to update the Board on industrial action by junior doctors due to take place the following week. IR advised that until now, the Trust had not been too badly affected by industrial action but the junior doctors' strike from 06:59 on 13 March for 72 hours would cause significant disruption as no derogations would be in place, for example to provide assistance to the emergency department. Specialty doctors would be relied upon for backfill. In order to maintain flow through the hospital, inevitably, elective services would be impacted. Nationally the major union, the British Medical Association (BMA), had been somewhat inflexible about how consultants and specialty doctors should vary their normal working practices during the course of the industrial action. Locally the Trust was fortunate in having very good relationships with Unions and IR was pleased that the Joint Local Negotiating Committee had been able to agree a framework for consultants and specialty doctors to flex their work patterns to support patients. An agreement over remuneration had been reached which was thought to be similar to neighbouring organisations and was not reflective of the BMA's published rates.
- 7.2 The embargo on the 2022 National Staff Survey Results had ended an hour prior to the meeting and DP reported that the Trust was consistently above average for the sector and remained at the top for staff engagement. In addition, the learning score had improved. DP advised that there were many questions feeding into the People's Promise themes. 69% of questions scored significantly better than the sector, whilst 30% were about the same as everywhere else and there was only one score which was worse than the rest of the sector. This was in relation to people being paid for additional hours worked. DP explained that there were many people working on the Trust's internal bank helping to reduce backlogs and as the Board was aware, this was not a sustainable situation. She added that it was worth noting that hospitals without internal banks, would probably not score the same as this work would be classed as conditional employment.
- 7.3 The best national scores within the peer group were for 'We are always learning' (with questions relating to appraisals, continuous professional development and other development within the trust) and staff engagement (with questions relating to whether people felt they had a voice, look forward to going to work and were included in department decisions). Within the People's Promise element there were four sub-scores and the Trust gained the highest score for:
- Autonomy and control, relating to whether people felt trusted to do their job, have opportunities to show initiative, can make suggestions for change and can influence how their work is done.
 - Appraisals and whether people felt their appraisal helped in their working role.
 - Motivation with people looking forward to going to work, following the improvement work around treating people fairly and DP highlighted some of the initiatives such as offering free breakfasts.
 - Involvement. For example, people feeling able to share their views and influence decisions.
- 7.4 Acknowledging that there was more work to be done, DP said that the results were nevertheless very positive. The ongoing focus areas encompassed bullying, harassment and discrimination, confidence in raising concerns, supporting staff with long-term health conditions, reducing additional hours, improving career progression and promotion opportunities, supporting bank staff and providing them with development and progression opportunities.

- 7.5 IR commented that the results were amazing and, with the backdrop of industrial action, provided good evidence of one real team working at MKUH. He felt that the scores around people working additional paid hours were significantly different rather than better or worse. HT acknowledged the fantastic results and suggested that the fact that people felt they had a voice was a factor in driving activity for the Trust.
- 7.6 DP said that it was worth noting that this was the first time the survey had incorporated Workforce Race and Equality Standard and Disability Standard themes and statistics enabling much more detailed analysis to be worked through by various groups before presentation to the Workforce and Assurance Board Committee. AD commented that the appreciative inquiry approach would help in identifying themes across the organisation. KJ added that the Trust would focus on anti-racism this year, noting the good engagement and successful structures in place in many areas encouraging people to speak up. These would be rolled out across the organisation to create psychological safety for different teams. In response to a question from GB, DP confirmed that the action plan for next year would drive 'You said, we did'. IR noted that although the staff survey results were very positive, it was known that people were experiencing discrimination and he commented that where staff engagement was good in an organisation, the differentiation was higher.
- 7.7 MV asked whether the staff retention turnover rates correlated with the survey and DP responded that the turnover rate was higher than desired but the results could be used to influence that. The next step was to roll out the granular detail to all areas where there were more than 11 departmental members of staff. To maintain anonymity, results from smaller teams would be merged with relevant peer groups. She added that Execs had received a presentation on Band 2 workers within the organisation where there was a significant high turnover to review possible interventions.
- 7.8 BM asked if the same survey information was available for the community and mental health sector and DP advised that the results were available for comparison on line but did not include the granular detail.
- 7.9 DP confirmed that the overall staff response was 40% which was about the same as the previous year, adding that some organisations had struggled this year and were as low as 18%.
- 7.10 JH thanked the team for their hard work which was clearly paying dividends with some very positive results.

The Board **noted** the Chief Executive's update.

8 Serious Incident and Learning Report

- 8.1 IR reported four serious incidents over the last two months, the second of which related to a patient who deteriorated and developed diabetic ketoacidosis (DKA) due to a relatively new and poorly understood medication that was not stopped when it should have been. He highlighted the ongoing quality improvement work such as thematic review of diabetes including medicines management, discharge summaries and pressure ulcers, the granular detail of which would be discussed at the next Quality & Clinical Risk Committee on 20 March. The response to the Coroner's Preventing Future Death report following the death of a patient with gallstone pancreatitis in April 2021, had been sent and would be discussed at the next Quality & Clinical Risk Committee.
- 8.3 Noting the issues for further focus, AD asked for an update on staff abuse and KJ confirmed that this would be discussed at Health & Safety Committee the following week. The cultural improvement programme was reviewing how these different incidents might be addressed. For example, by debriefing after traumatic incidents and reinforcing across the Trust that expected standards of behaviour were to be maintained even when working under pressure.

Action: The Behaviour Standards to be placed in iBabs

The Board **noted** the Serious Incident and Learning Report.

9 Feedback from Maternity Assurance Group (MAG)

- 9.1 AD advised that in addition to the matters covered under Items 10 and 14 below, the following topics were discussed by the Maternity Assurance Group.
1. A report on improvements to the effectiveness of obstetric ultrasound services. For example, extending the use of translation services to encompass patient letters; contacting non-attenders on the day to take steps to address any issues and assist with engagement; ongoing recruitment of staff into the service with more people starting in September. Following the presentation of the report, a review by operational colleagues was being undertaken to further enhance these improvements.
 2. Mandatory and other training, particularly safeguarding which would be followed up by a paper at the next meeting.
 3. The reduction in the vacancy rate from 17% to 15%.
 4. Ongoing analysis from the recent culture survey where 100 responses had been received. An action plan was expected to follow.
 5. The trauma risk management team were organising training for midwifery and paediatric staff aimed at supporting people affected by traumatic events.

The Board **noted** the feedback from the Maternity Assurance Group.

10 CQC Maternity Patient Experience Update

- 10.1 MD introduced herself and drew the Board's attention to the benchmarking details within the full report from the maternity patient experience survey. She highlighted some of the ongoing work in respect of areas identified for improvement.

Induction of labour

Targeted work around informed consent where expectant mothers would be contacted by phone to make sure they understood the reason for induction and felt well-informed about the process, to discuss what they could expect to happen on arrival and thereafter and to answer any further questions or concerns they may have.

Birth partners

'Having support from your birth partner at all times when you need it' was identified as an area for improvement and from the middle of February, birth partners staying overnight was reintroduced. The logistics for this had been codesigned with the local Maternity Voices Partnership, ensuring it did not negatively impact on other practices such as 'night mode' introduced last year to address disruptions during the night raised in the previous survey. HT asked if the Trust was in a better position post-Covid with regard to access for birth partners staying overnight. MD responded that the hospital had reverted to its pre-Covid position. There were particular groups of women who really valued that service, for example, those coming in for induction or in the case of multiple births. The practice was reviewed to consider the impact, such as increased noise, lighting and reduced sleep. MD added that people could also feel uncomfortable with the situation. The wards could be modelled to address these aspects such as using the bed bays differently and a co-produced booklet had been introduced explaining how the service would be managed. Sleep packs were due to be introduced following studies on the impact of insomnia during pregnancy and postnatally. There were clear parameters around staying overnight from an infection prevention and control perspective. IR pointed out that wearing of masks in all clinical areas was due to cease by the end of the week in view of local and hospital prevalence. As infection prevention and control director, he did not expect Covid to change these arrangements in the future.

Transfers

There was greater focus on maintaining privacy and dignity for patients moving from Labour Ward to Theatre or from inpatient areas to the Labour Ward

- 10.2 Going forward, the team were looking to introduce continuous benchmarking, moving CQC patient experience questions into Tendable, (an inspection app to measure and drive quality across the hospital with data collected on a monthly basis). Wellbeing walkrounds had been introduced, targeting inpatient wards and MD advised that as a result, some emerging themes had been added to the overall practice, experience and quality improvement tracker, which were being assessed and monitored.
- 10.3 MD explained that all the women who gave birth in February 2023 would be surveyed by the CQC and the results would become available towards the end of the year.
- 10.4 JH asked how the patient experience platform (PEP) interfaced with this work and KJ advised that PEP could gather data from many different sources such as friends and family tests, comments, feedback and complaints. Building this out to incorporate the work the maternity team were undertaking would provide a more holistic picture of patient experience. To avoid confusion, JH highlighted the difference between use of the term PEP at this trust, to that of the rest of the country where it relates to the patient portal, MyCare.

Action: KJ to provide a patient experience presentation for May's meeting focusing on some of the themes across the hospital from Tendable and PEP data.

- 10.5 Reviewing the results of the survey, DA expressed the opinion that the service was good at providing advice and guidance but struggled where help was needed, or where concerns were being raised and he asked if this was due to staffing levels or training issues. MD agreed that there were examples where the team was more reactive than proactive in managing certain areas. Buzzer audits on inpatient wards had been undertaken to look at why people were calling for help and MD gave examples of where improvements could be made such as making towels more accessible where someone had wanted a shower but had no towel, increasing support for infant feeding so that people did not have to wait too long, providing more training to help staff in the management of pain relief and communication. YC added that she and the maternity team had forensically examined the survey to build a set of questions at a more granular level to give the clinical team the opportunity to resolve some of the issues at the point of care and develop better understanding of how interactions could impact on patients.
- 10.6 IR commented on the amount of good work within Maternity around patient experience but it was recognised that the built environment was sub-optimal and was the main driver for the new Women & Children's Hospital, which the Trust was looking forward to the construction of, as soon as possible.

The Board **noted** the CQC Maternity Patient Experience Update.

11 Performance Report for Month 10 (January 2023)

- 11.1 EL highlighted the following from the new style report.
1. Activity levels had been challenging in January although emergency activity levels were lower than December with the majority of patients moving through the department well.
 2. The ambulance handover position had held at 98% for people seen within an hour and 81% within 30 minutes.
 3. Bed occupancy was predictably very high and was impacted by community provider and workforce issues.
 4. The average number of patients not meeting the criteria to reside was 82 but on occasion was closer to 100, and escalation bed capacity was also very high.
 5. The elective performance had been impacted, reflected by the regular use of the Day Surgery Unit as an escalation area.
 6. Diagnostics continued to recover despite the known challenges with MRI and CT scanning.
 7. Cancer recovery was on trajectory against plans submitted to the region and improvements continued to be made against that.
 8. A number of internally set safety targets were breached.
 9. The Trust declared the anticipated breach by the end of March of the 78-week elective recovery target, caveated by the cancellation of activity due to the 72 hour industrial action by doctors in the

week beginning 13 March. The premise for this was the focus on emergency services and high risk areas over this period.

- 11.2 Noting the improved non-attenders rate at 5.8%, HT asked whether this was as a result of any particular interventions. EL responded that the figure was generally between 5-7%, adding that the technology behind booking processes was being reviewed and this could have been the cause of the slight reduction.
- 11.3 HH commented on the number of NICE (National Institute for Health and Care Excellence) breaches (35 in one month) and IR responded that over the winter, many corporate staff had been working clinically and therefore were not available to review these large documents.
- 11.4 Following positive comments on the new format of the report, JB explained that both new and old-style reports would continue to be provided until the end of the year. It was highlighted that some information was not included in the new format, such as the NICE breaches, and therefore it was agreed that the first page of the scorecard would continue to be provided going forward. The associated graphs would be made available on request.

Action: An explanation of the error markers to be placed in the Trust board portal (iBabs) for reference.

The Board **noted** the Performance Report for Month 10

12 Finance Report for Month 10 (January 2023)

- 12.1 TW explained that the report covered the period from April 2022 to January 2023. The cumulative income and expenditure position showed a £2.8m deficit which was marginally off plan. The Trust continued to report a break even position for the end of the year. This would be reliant on significant non-recurrent mitigation, the main reasons for which were that more was being spent on planned care capacity than was being received since there were no monies being paid officially for over-performance following the in-year policy change by NHS England. The principal reason for the policy change had been that the majority of hospitals were not achieving their activity plans during 2022-23 and stood to have funding clawed back from their positions, exposing much debt across the country. The Trust was achieving the target of 104% but, due to the policy change, would not qualify for additional funding. Conversations were ongoing as part of year end preparations to identify any monies available in recognition of the extra activity and achievement. TW hoped to be able to provide a more positive report at year end.
- 12.2 The operating cost position was affected by vacancy, sickness and open escalation areas incurring Pay costs in excess of budget. Discussions had taken place at both Finance & Investment Committee and Workforce and Development Assurance Committee around the many interventions, seeking to unwind some of the premium costs, most notably around the international and domestic efforts to increase the vacancy fill rate.
- 12.3 The Trust delivered a good financial efficiency performance, tracking 70% of the target, above peer group delivery for the year. Nevertheless, the Trust was seeing the same issues that all organisations were grappling with, around a residual shortfall against the target and the proportion of savings that were dependent on recurrent, cash for delivery. Currently, that was showing as a brought forward shortfall into 2023-24 which would put pressure on the underlying position for next year. Discussions were taking place amongst divisional teams around how many of the non-recurrent schemes could be converted to permanent. In response to a question from HH regarding progress with the better values programme, TW advised that there was good engagement from teams and plans against half of the working target had come forward. However, there were many challenges and TW gave the example of inflation which was exceeding the level of funding available at every turn. The original award had been set last autumn based on 5.5% inflation, but this was now exceeding 7%. Every aspect of efficiency was being affected.

- 12.4 The issues, particularly the elective recovery funding, was evolving into a different type of challenge for 2023-24 and meetings with NHS England nationally and system partners were taking places to work through these issues.
- 12.5 On the capital side, over 100 schemes would have been delivered by year end with no obvious cash concerns. The focus had moved to establishing plans for 2023-24.
- 12.6 Acknowledging the pressures on the finance team particularly with regard to elective recovery funding, HT, expressed her thanks to TW and the finance team.

The Board **noted** the Finance Report for Month 10.

13 Workforce Report for Month 10 (January 2023)

- 13.1 DP highlighted the following from the report.
1. The continuing reduction in the vacancy rate and the highest headcount on record for the Trust at 4075, an increase of 200 from the previous year.
 2. The absence rate continued to fall and the increase to retention and turnover rates was starting to slow. DP warned that the interventions in place around these metrics would take some time to have an impact.
 3. In response to data requested at the last Board, DP advised that the average costs per hire were £240 and included advertising and visa checks but the calculation did not include the international nurses, funded separately through the business case. Time to hire was a more recognised metric within the NHS and DP acknowledged there was more work to be done to reduce this, adding that this would have a positive impact on costs per hire. JS advised that the average cost for hire was around £190 and the Trust's time to hire was not too far away from other employers. Constraints around NHS employer checks were acknowledged.
 4. Statutory mandatory training remained above target.
 5. Nursing vacancies were down to 68.
 6. Efficiencies within HR were being reviewed such as automation of paper forms to make it easier for line managers to complete processes.
 7. A consultation had been held to change the pay date with a view to providing enough time to run a supplementary pay run.
 8. Three new professional recruiter posts had been developed and postholders would be assisting recruiting managers, talking to candidates and making sure that interviews and all other processes were conducted fairly and consistently. The role would be reviewed within 12-18 months and was expected to improve the speed of recruitment.
- 13.2 HH congratulated the workforce team for achieving 8.6% vacancy, above the 10% target, but expressed concern over the high level of vacancies for health care assistants. DP referred to the review of Band 2 posts in terms of career progression, detailed under Item 14. She advised that many people in this cohort often changed jobs regularly moving to warehousing, logistics and retail. Some would also be studying and looking to progress whilst others thoroughly enjoyed the role and would remain throughout their careers. The Band 2 review would involve discussions to establish which staff were looking to feel challenged and to progress their careers. JS advised that a significant factor for staff retention at this level related to the quality of onboarding and orientation, highlighting the importance of getting this right.
- 13.4 HH requested further detail on the 0% vacancy rate in Medical and Dental, adding that according to Model Hospital (the hospital provider-level benchmarking tool), the Trust had a very high weighted average unit. IR responded that this was thought to be due to the very limited number of trainees at the Trust half of whose salaries were paid for by the Deanery, compared to most other trusts within the south of England. Therefore, most trainees were fully trust funded because of the history of when those posts had been created. JH added that this was a systemic issue IR had been investigating for some time and the Board could be assured that without exception, doctors were not being paid outside of national pay rates. IR added that when he joined the Trust seven years ago, the vacancy rate was around 10%. A vacancy rate close to 0% was very positive.

The Board **noted** the Workforce Report for Month 10.

14 Maternity Staffing Report

- 14.1 MD explained that the maternity clinical workforce data was reported at Maternity Incentive Scheme Board every 6 months, covering a number of elements some of which were mandated by the Maternity Incentive Scheme. MD highlighted the following from the report.
1. From an obstetrics perspective the roles and responsibilities from the Royal College of Obstetricians and Gynaecologists (RCOG) had been updated and the risk on the maternity risk register around obstetric gaps was due to close.
 2. The Trust was compliant with the Anaesthesia Clinical Services Accreditation (ACSA) standards.
 3. There had been good recruitment within the neonatal environment and the area of focus was now on Qualified In Specialty (QIS) trained staff. The requirement was for 70% of staff to be QIS trained. The Trust was at 64% with four being trained currently which, once qualified, would bring the service over 70%.
 4. Regarding the midwifery workforce, the details of Birthrate Plus were published in May 2022. This tool, repeated every three years, looked at acuity of all women using the service to identify optimal staffing levels. There had been a significant increase of 10% in acuity since 2018.
 5. A mapping exercise was undertaken for maternity support workers and maternity care assistants following a national drive to progress the roles and put career pathways in place. Three midwifery apprenticeship roles would be available from September.
 6. The four appendices to the report related to actions to maintain compliance with supernumerary status and to maintain 100% compliance with one to one care in labour, the workforce tool used to map QIS trained neonatal staff and the action plan for neonatal nursing and medical workforce to attain Tier 3 of the Maternity Incentive Scheme.
- 14.2 YC added that it was important to understand the approach to Maternity Services fill rates in maintaining safe and efficient levels of staffing. She gave the example of redeploying registered nurses to maintain supernumerary status whilst maintaining one to one care in the Labour Ward. She added that a huge piece of work was ongoing involving all clinical teams across the Trust working closely with HR and e-rostering colleagues, looking at efficiency and effectiveness of the rosters and staffing in terms of the management of annual and study leave.
- 14.3 In response to a request from HH for more information on activities to address inequalities, for black mothers for example, MD explained that benchmarking against the various recent published reports had taken place and she highlighted the ongoing work with the local maternity network system (LMNS) to develop an equality and equity strategy. One of the priorities for 2023-24 was enhancing the experience for those using the service and also reaching out to those not accessing services. A new emotional wellbeing service, linked to CNWL (Central and NorthWest London NHS Foundation Trust, local community services provider), had been set up and a recently appointed health and lifestyle midwife was looking at some of the areas where improvements could be made. MD added that ethnicity data was always included in any reviews undertaken, for example, by the major obstetric haemorrhage review group.
- 14.4 AD thanked MD and her team for all their hard work reflected in the report.

The Board **noted** the Maternity Staffing Report.

15 Inclusion Leadership Council Feedback

AD advised that the new format for the meeting, shared with the Board in January, was now in operation. The BAME network had invited the CQC to meet with them and there had been many positives coming out of the discussion, including pastoral care. All the areas raised were already well known to the Council and the Trust and were being worked on. AD added that this was the type of initiative the Trust wanted to encourage the networks to take. The Associate Director for Charity and Fundraising, Vanessa Holmes, was now on the committee, helping to access charitable funds. Development of networks had been discussed, looking at future-proofing and recruitment.

The Board **noted** the Inclusion Leadership Council Feedback

16 Risk Register Report

- 16.1 KJ presented the report and advised that concern had been raised at the last Trust Executive Committee regarding overdue Risk 182 (radiology examinations requested by untrained staff) and how this had come about. She reported good movement on the risk register with people actively managing their risks. KJ highlighted the key risk indicators at the bottom of the report relating to staff abuse and accidents.
- 16.2 HH asked whether the issues raised around using the Trust's risk management system, Radar, had been resolved. KJ responded that the risk management aspect of the system was fairly easy to use but acknowledged that the incident reporting element was an issue and staff were reluctant to complete the new form, in view of the new national learning from incidents framework, PSIRF (Patient Safety Incident Response Framework) which took around 10 minutes to complete. Issues with the form had been raised with NHS England but they would like the Trust to keep all aspects of it and this was impacting on staff's willingness to report. The form was expected to be in use across the country from April 2023.
- 16.2 MV commented that the format of the report did not provide adequate indication of levels of risk. KJ responded that the team had tried various means to address this, avoiding the inclusion of many lines from the risk register spreadsheet. She confirmed that overdue risks could be seen to be riskier as controls deteriorate. She agreed to work with teams to resolve this issue.

Action: KJ and KMB to review the risk register report to provide greater clarity on levels of risk

- 16.3 The Board **noted** Risk Register Report.

17 Board Assurance Framework

- 17.1 There were no significant changes to the Board Assurance Framework except to Risk 5 (suboptimal head and neck cancer pathway), reduced to 15 from 20, as indicated in the report.
- 17.3 The Board **noted** the Board Assurance Framework.

18.1 Summary Report for the Audit Committee – 12 December 2022

- 18.1.2 The Board **noted** the report.

18.2 Summary Report for the Finance and Investment Committee Meeting – 06 December 2022

- 18.2.1 The Board **noted** the report.

18.3 Summary Report for the Trust Executive Committee – 14 December 2022

- 18.3.1 The Board **noted** the report.

18.4 Summary Report Trust Executive Committee Meeting – 11 January 2023

- 18.4.1 The Board **noted** the report.

18.5 Summary Report for the Quality & Clinical Risk Committee – 12 December 2022

- 18.5.1 The Board **noted** the report.

18.6 Summary Report for the Charitable Funds Committee 5 December 2022

- 18.6.1 The Board **noted** the report.

19 Forward Agenda Planner

- 19.1 The Board **noted** the Forward Agenda Planner.

Chair's report: May 2023

To provide details of activities, other than routine committee attendance, and matters to note to the Trust Board:

1. The building of the radiotherapy centre is now so far advanced that the 'topping out' ceremony is planned for the 4th May and will be attended by members of staff, supporters and partners.

The launch of the charitable fundraising to support the facility took place on the 21st April and was generously hosted by Christian Horner, Team Principle and CEO of Oracle Red Bull Racing. The event took place at the Red Bull headquarters in Milton Keynes and we were joined by many sponsors and fundraisers who have already enabled us to enhance our services in other areas of the organisation. I am very pleased to report the fund has already reached £110,000 of the target of £500,000.
2. The Care Quality Commission inspected MKUH maternity services in March and I was interviewed with colleagues in my role as the NED for maternity safety. We await the final report but initial feedback did not identify any areas of major concern. The CQC did identify good practice, including the training for midwives for home delivery .

It was helpful that in February we had met with the East of England Chief Midwife and team to review our improvement plan and progress.
3. On the 24th March I accompanied Governor and Friends of MKUH Shop Chair, Clare Hill on her trolley round to the wards. It was a great opportunity to see the usual day to day activities and how they vary across specialities, as well as meet staff and patients.

It was obvious Clare is a welcome sight and many staff as well as patients were ready to buy snacks or other items.

Many thanks to Clare for her time and I highly recommend the experience to other colleagues; it's an ideal way to gain an appreciation of the work and some of the challenges taking place every day across MKUH.
4. On the 25th April I was delighted to attend with Vanessa Holmes, Associate Director Charity and Fundraising, the presentation of a cheque for £50,000 from the Friends of MKUH charity, towards the hospital's radiotherapy centre appeal. We are very grateful for their generous and continued support.
5. As part of our external focus to work with partners to improve services and access, I met with the Chair of Oxford University Hospital, Sir Jonathan Montgomery and he visited the renal unit at MKUH which is run by Oxford. We were able to discuss some of the challenges facing our organisations and the projected population growth for Milton Keynes. Ian Reckless provided a comprehensive overview of medical training and opportunities for services, as well as our ambitions for further development and progress on the new radiotherapy unit.

6. I had a fascinating visit and met with the robotic assisted surgery team. The team spirit was impressive and patient outcomes significantly enhanced by the technology. It will be exciting to see this service develop and expand as capacity and training allow.
7. I attended the Declaration of Office of the new High Sheriff of Buckingham, Dame Anne Limb. She is a supporter of the hospital as well as many charitable community organisations. Her speech emphasised the need for sustainability and protection of the environment, as well as support and development of areas of deprivation.
8. For information:

Report to the Milton Keynes University Hospital Trust Board
4 May 2023

**Bedfordshire, Luton and Milton Keynes Health and Care Partnership and
Integrated Care Board update**

Vision: “For everyone in our towns, villages and communities to live a longer, healthier life”

Please state which strategic priority and / or enabler this report relates to

Strategic priorities

- Start Well:** Every child has a strong, healthy start to life: from maternal health, through the first thousand days to reaching adulthood.
- Live Well:** People are supported to engage with and manage their health and wellbeing.
- Age Well:** People age well, with proactive interventions to stay healthy, independent and active as long as possible.
- Growth:** We work together to help build the economy and support sustainable growth.
- Reducing Inequalities:** In everything we do we promote equalities in the health and wellbeing of our population.

Report Author	Joe Harrison, Chief Executive Milton Keynes University Trust and Maria Wogan, Chief of System Assurance and Corporate Services, BLMK ICB
Date to which the information this report is based on was accurate	28 April 2023
Senior Responsible Owner	Felicity Cox, BLMK ICB CEO

The following individuals were consulted and involved in the development of this report:

- BLMK Health and Care Partnership – 7 March 2023
- BLMK Integrated Care Board – 24 March 2023.

This report has been presented to the following board/committee/group:

This report summarises key items of business from the BLMK Integrated Care Board and BLMK Health and Care Partnership (a Joint Committee between the local authorities and the ICB) that are relevant to the Milton Keynes University Hospitals Trust. Key items of business from these meetings are detailed in Appendix B. The main items of interest for the Trust Board are covered in the main paper.

Purpose of this report - what are members being asked to do?

Milton Keynes University Hospital is a partner organisation in the Bedfordshire Luton and Milton Keynes Integrated Care Board (ICB). Joe Harrison is a partner member of the Board of the ICB, and Alison Davies is a member of the Health and Care Partnership, which is a joint Committee of the ICB and local authorities in BLMK.

This report connects the Trust and BLMK governance by updating on work at BLMK level and highlighting specific issues that are likely to be of interest to or require decisions from the Trust.

Recommendations:

The Trust Board is asked to:

1. **Note** progress on the BLMK NHS Operational plan 2023/24
2. **Note** that the Health and Care Act 2022 requires the ICB and its partner NHS Trusts and NHS Foundation Trusts to prepare and publish a plan setting out how they propose to exercise their functions in the next five years.
3. **Review and comment on** the draft BLMK Joint Forward Plan as agreed at the ICB Board on 24 March.
4. **Note** that the Trust's Director of Finance is involved in the development of the system's capital plan which will align to the Joint Forward Plan in the same timescale.
5. **Note** the updates provided from the meetings of the BLMK Health and Care Partnership and Integrated Care Board meetings in March 2023 as listed at Appendix B.

1. Brief background / introduction:

The following summarises items of interest that have been considered by the BLMK Health and Care Partnership and the Board of the ICB.

1.1 BLMK (NHS) Operational Plan 2023-2024

The Health and Care Act requires the BLMK ICB to produce an Operational Plan (draft submitted at the end March 2023).

The Operational Plan is for 2023/24 and requires ICBs to describe how the local NHS will deliver against mandated NHSE operating plan requirements, including agreement of the BLMK NHS system budget. This plan takes account of local priorities which were reported to the Board of the ICB on 24 March 2023. A further version of the operational plan will be submitted to NHSE on 4th May 2023, taking into account national, regional and BLMK discussions to further develop the plan and address finance and activity challenges. The system CEOs have been involved in the development of the plan and the Trust CEO will be able to report the latest position to the Trust Board.

1.2 BLMK Joint Forward Plan

The Health and Care Act also requires the BLMK ICB and its partner NHS Trusts and Foundation Trusts to produce a Joint Forward Plan covering a minimum of five years (final version due end June 23).

The Joint Forward Plan (JFP) is required to set out a framework for how the ICB and partners intend to arrange and/or provide services to meet our population's physical and mental health needs. This will include narrative on the universal NHS commitments and address the four core purposes and statutory duties of an ICS:

- Improve outcomes in population health and healthcare
- Tackle inequalities in outcomes, experience and access
- Enhance productivity and value for money
- Help the NHS support broader social economic development

The Board of the ICB agreed that the BLMK JFP, will extend from 2023 to 2040 to address:

- i) the expected and sustained expansion of our population to 2040 and beyond.
- ii) Multi-agency very complex issues which are best resolved through partnership delivery to improve health outcomes, tackle inequalities in local communities whilst ensuring optimal use of public money to deliver services
- iii) wider determinants of health and well-being to maximise prevention and supporting communities to thrive.

The extended timeframe of the BLMK JFP will enable all partners of the BLMK ICS to develop longer-term plans in collaboration to best deliver the ICS' statutory duties in the local context of sustained population growth over this period.

The Plan has been developed based on prior engagement with the public and partners will be published in June 2023 following further engagement including with Health and Wellbeing Boards, NHS Trust Boards and VCSE groups. As the JFP focuses on longer-term delivery of existing plans, the plan will not require full formal public consultation.

The draft JFP is attached at Appendix A and available on the ICB Website [here](#). The Board are asked to discuss and comment on the draft Joint Forward Plan and any comments will be reported to the Board of the ICB for consideration prior to submission

to NHSE by 30 June 2023. A capital plan is also in development and the Trust's DoF is involved in this work, it will align with the Joint Forward Plan.

1.3 Other items of interest to the Trust Board

Musculoskeletal (MSK) Health Services – Forthcoming Procurement

Due to expiry of the contracts with four MSK providers across BLMK, the ICB has been working with patients, providers and wider stakeholders to determine how services should transform to:

- 1) improve the quality of life for people with MSK
- 2) improve productivity, removing fragmentation and duplication
- 3) focus on prevention of MSK illness which is particularly impacted by rates of obesity, levels of physical activity and smoking; and
- 4) release GP capacity by providing direct access to physiotherapy appointments.

An Integrated MSK and Pain Service Specification has been drafted based on best practice and is in the process of being finalised. Following ICB governance approval between February – March 2023 and subject to feedback from market testing, the intent is to commence a full procurement exercise between April – September 2023, followed by mobilisation of the new provider/s during October 2023 – March 2024 with official service commencement on 1 April 2024. It is expected that any staff impacted by a change of provider would transfer to the new provider/s. Members of the public will also be invited to be part of the new provider/s mobilisation to ensure local needs are captured and implemented.

BLMK ICB Board Assurance Framework (BAF)

The BAF sets out the key system risks which the Board monitors at each of its formal meetings. The system risk summaries are provided in the table below:

Ref	Risk Title	Risk Description	Current Risk Rating	Change
BAF 1	Recovery of Services	There is a risk that the NHS is unable to recover services and waiting times to pre-pandemic levels due to Covid related pressures, or demand led pressures. This may lead to poorer patient outcomes and reputational damage.	16	
BAF 2	Developing suitable workforce	If system organisations within BLMK ICS are unable to recruit, retain, train and develop a suitable workforce then staff experience, resident outcomes and the delivery of services within the ICS, ICB People Responsibilities and the System People Plan are threatened.	20	
BAF 3	System Pressure & Resilience	As a result of continued pressure on services from various factors (staff sickness, increased activity etc) there is compromised resilience in the system which threatens delivery of services across BLMK	20	
BAF 4	Widening inequalities	There is a risk that inequalities in the system widen due to a range of factors leading to compromise to population health and increases in system pressure in the most deprived areas.	16	
BAF 5	System Transformation	There is a risk that as a result of significant operational pressures, there will be decreased capacity to focus on strategic transformational change to deliver improved outcomes for our population.	16	
BAF 6	Financial Sustainability and Underlying Financial Health	As a result of increased inflation, significant operational pressures, elective recovery and the enduring financial implications of the covid pandemic - there is a risk to the underlying financial sustainability of BLMK that could result in failure to deliver statutory financial duties.	15	
BAF 7	Climate Change	Due to climate change and wider impacts on the environment and biodiversity, there is a significant risk of increased pressure on health and care services.	16	
BAF 8	Population Growth	As a result of fast rate of population growth in BLMK, there is a risk that our infrastructure will not keep pace with the needs of our population, resulting in poor health and wellbeing for residents.	20	
BAF 9	Rising Cost of Living	As a result of rising cost of living there is a risk that residents will not be able meet their basic needs resulting in deteriorating physical and mental health resulting in pressure on all public services	16	

2 Appendices

Appendix A –Joint Forward Plan

Appendix B – Summary of BLMK Health and Care Partnership and ICB Board business.

Summary Overview: the BLMK Plan for our Joint Forward Plan

It is an NHS England requirement for every ICB to produce a 5-year Joint Forward Plan, which complements the ICB Strategy and NHS 1-year Operating Plan to set how we will:

- Use our ICB to deliver the Place Plans in the medium-term, supported by our Provider Collaboratives, and focused on local population need (JSNA)
- Outline our approach to deliver the ICB's responsibilities ('4 pillars' of tackling inequalities, improving health outcomes, providing value for money, and supporting growth and sustainability)

The Joint Forward Plan (JFP) is due for submission from ICBs on June 30th 2023. However, NHS England have required all ICBs to submit a draft together with our 2023-4 NHS Operational Plan submission at the end of March.

This paper sets out the proposed BLMK approach to developing our JFP by June 30th – it is a Plan for Our Plan.

ICB members are asked to review the outline draft, provide responses to specific questions detailed in the cover sheet, and – pending adoption of feedback – approve this approach to creating the BLMK Joint Forward Plan.

SECTION ONE: Joint Forward Plan Introduction

The Joint Forward Plan does not require new content – it is the medium-long term view of how we deliver the aims and objectives of our Place Plans in partnership. Key to this medium-long term view is not just how we meet population growth and changing needs within our resources – but how we collaborate to tackle our most 'wicked' issues to support our communities to thrive.

The BLMK Joint Forward Plan will focus on those areas where collaboration at Place is required to achieve this. Specifically, our Joint Forward Plan will:

- **Focus our collaborative long-term plan on meeting the changing needs of our population** (not individual organisations or service lines)
- Develop our **processes and partnerships to build an adaptive, integrated system** which can respond to local population need sustainably within our resources
- **Develop & deliver infrastructure strategies** to tackle inequalities, improve health outcomes AND reduce avoidable cost

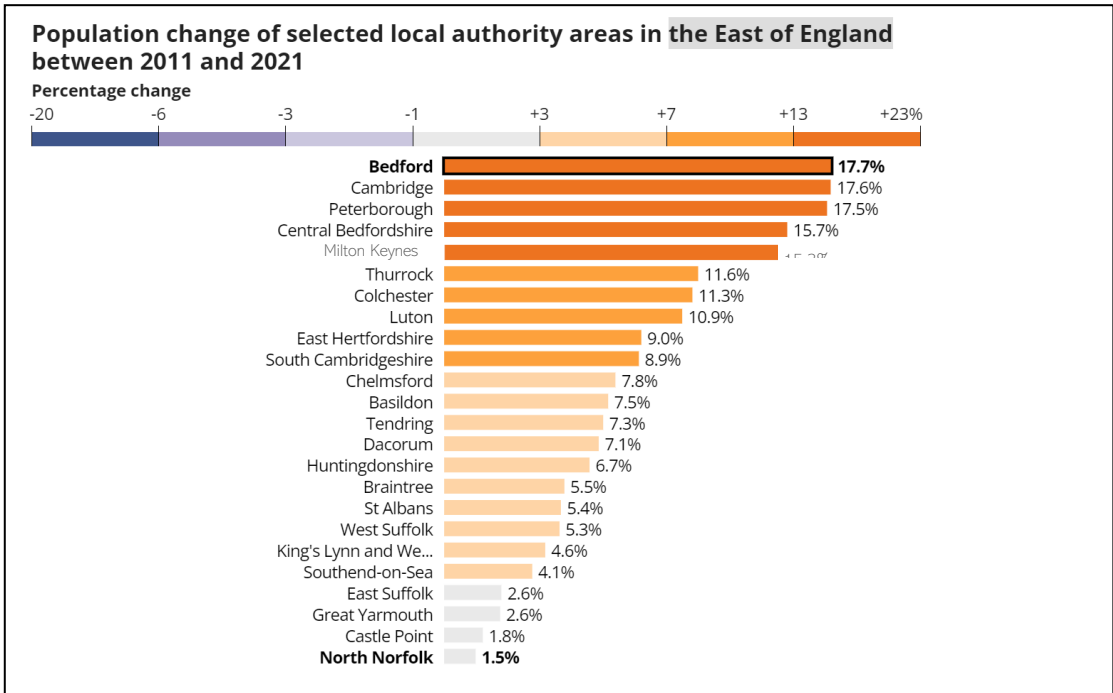

These plans are the long-term/ strategic delivery plan for Place Plans. Where Provider Collaboratives span multiple Places, and Place Plan actions are best delivered at scale, Provider Collaboratives (for example, the Bedfordshire Care Alliance) will work across multiple Places to deliver a consistent delivery model across the constituent Places.

Our Population

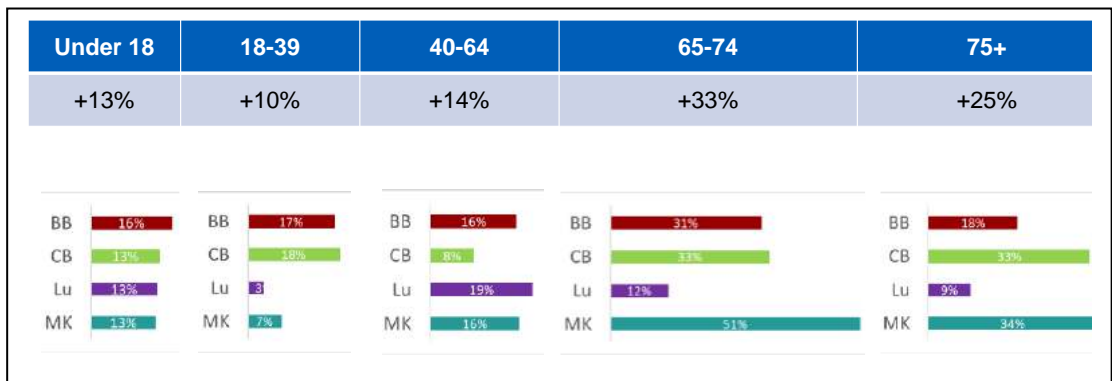

The Boroughs within BLMK ICB are diverse with a rapidly growing population.

Over the last ~10 years, roughly 5,000 homes were completed per year across BLMK (CBC > MK > BBC > Luton). Local Plans / housing strategies suggest around 6,000 new homes will be built across BLMK per year over the next ten years. This is significantly more than National (ONS) population projections assume a growth of c.2,400 homes per year across BLMK.

The ONS new housing projections for BLMK are out by a factor of 2.5, as BLMK is one of the fastest growing populations in the UK, and this trend is expected to continue.

Not only will there be more residents in the area over the next 15-20 years, but the demography, health needs and demand of our population will also change significantly.

All of our Boroughs have strong plans to grow housing, employment opportunities and prosperity in a sustainable way, focused on the needs of specific communities within each Borough.

[examples from each Place to be added]

The BLMK Joint Forward Plan recognises that we cannot do more of the same with our resources (workforce, infrastructure such as estates and digital and finance) to meet this growing and changing population need.

The Plan aligns to our strategic priorities and the recognition that the actions that we take now will have a significant impact on our ability to improve the health and outcomes for our population in the future.

Given the variation in inequalities and health outcomes, people across BLMK hit the thresholds for start well, live well and age well at different ages across their life.

The known wicked issues for BLMK are:

- Rapid population growth and demographic shifts (specific to each Borough)
- Challenges accessing core primary care (including GP and dental services)
- Inequalities experienced by communities within BLMK
- Impact of COVID on residents
 - Deconditioning of people with frailty
 - Increased safeguarding and mental health issues for children and young people
 - Delays in accessing routine elective surgery
- Cost of living crisis affecting families
- Poor health of the population
 - Obesity
 - Long term conditions

SECTION TWO: Medium Term Affordability

[NHS & LA headlines – to be added for June submission]

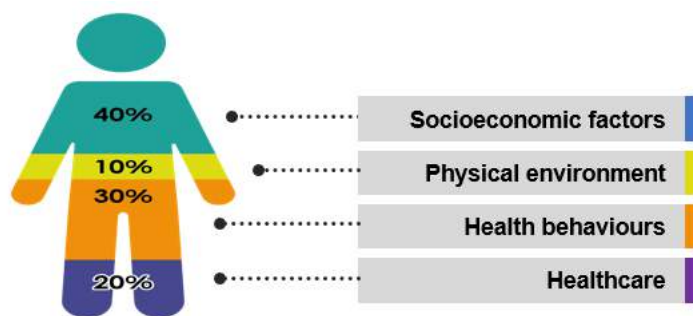

SECTION THREE: Our Strategy

Our system strategy sets out our ambition for improving health outcomes and reducing inequalities so that everyone in our city, towns, villages and communities can **live a longer, healthier life**. This means increasing the **number of years people spend in good health and reducing the gap between the healthiest and the least healthy in our community**.

Our strategy set out three questions which we aim to answer by working in partnership:

1. Are we doing the right things to improve health outcomes and tackle inequalities for our residents?
2. Are we making the best use of partnerships between public services, VCSE partners and local communities?
3. Are we working with our people and communities to understand what matters to our residents and co-designing and co-producing sustainable solutions.

The benefit of working in partnership is the opportunity this affords us to look at all of the factors that affect our changes of living a longer, healthier life.

Our system strategy builds on our health and wellbeing strategies at Place and our understanding of what matters to our residents.

Our Joint Forward Plan will also be firmly grounded in this understanding of what matters to our people and communities, our Joint Strategic Needs Assessments, Health and Wellbeing Strategies and emerging priorities at Place.

SECTION FOUR: A Joint Approach – Maximising Benefit to Residents

Our Joint Forward Plan highlights the shared ‘wicked issues’, where an innovative and collaborative approach is needed to deliver the Boroughs’ Place Plans and the NHS targets for access and outcomes for all residents sustainably to 2040 and beyond.

As such the BLMK Joint Forward Plan is built on a strong shared ethos between all partners in the ICB as to how best to achieve this sustainably:

1. **Prevention and earlier intervention**
2. **Locally configured interventions that meet the needs of residents at a Neighbourhood, Place or System-level**
3. **Getting It Right First Time**, especially for those residents who have the
 - a. Worst outcomes / highest risk factors / greatest inequalities
 - b. Highest and most complex needs/ unmet needs driving high volumes of interaction with health, care and public sector services, including police, fire and criminal justice systems
 - c. Voice least often heard/ face the most barriers to access
 - d. High volume, low complexity demand for health care (elective and same day urgent care)
4. **Co-production with local communities**
5. **Leverage the inter-dependencies and interfaces across health and care services** to
 - a. make every contact count – build opportunistic prevention & support to self-care into existing pathways of care
 - b. reduce low value and repetitive interventions for residents and our teams
 - c. optimise use of resources (workforce, estates, finance)
6. **Optimise the operating environment for health, care and civic services** – across traditional service and organisational boundaries with co-ordinated actions to:
 - a. Tackle inequalities

- b. Stimulate local employment and economic development
- c. Sustainability and green agenda
- d. Long-term workforce development,
- e. Market management
- f. Strategic investment and utilisation of digital and estates assets

The key differences between existing Local Authority and NHS planning approaches are:

- NHS focused on short-term delivery (3-year funding cycle, 1-year operating plan) / LA plans for infrastructure and population growth are over a generation (15-20 year plans)
- NHS operating objectives are focused on the standards that clinical services must achieve for the patients who access them / LA considers the whole population living in a specific geography

All health and LA partners in ICBs have a shared responsibility to the populations they serve in their use of public money:

The four pillars of an ICS are to:

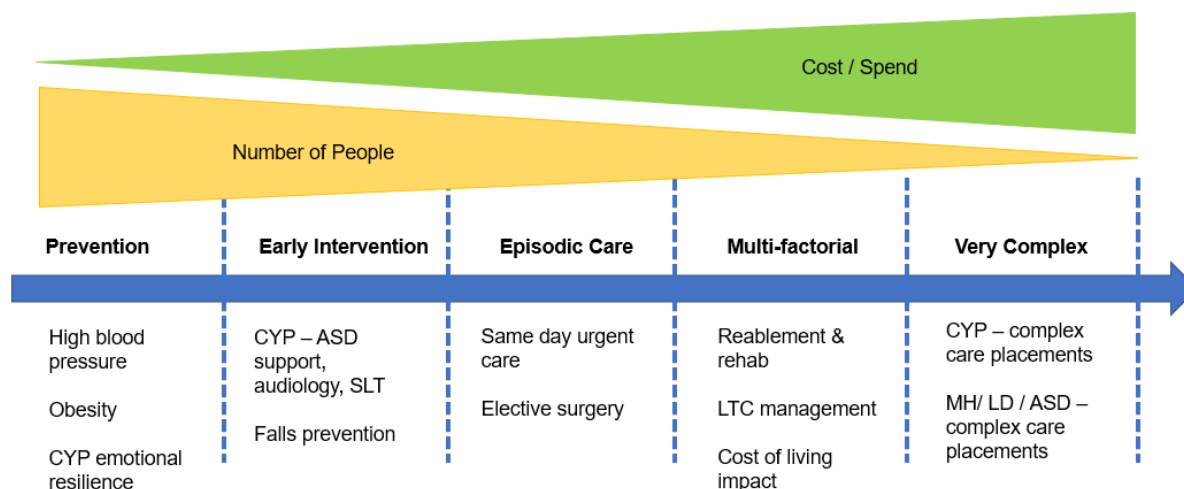

The BLMK Joint Forward Plan will therefore:

1. Focus on the needs of all residents at Place (not service lines / public sector institutions)
2. Extend to 2040
3. Identify the methodology by which we will:
 - Understand the growth, changing demographic and needs of our populations at Place to 2040
 - Outline key milestones and critical delivery points based on population size and need, incorporating existing 'wicked issues' and known changes in the operating environment (for example, devolution of specialised commissioning, or the creation of new towns in BLMK Boroughs)
 - Confirm the methodology for systematic review and strategic planning across key domains where a joint intervention between NHS and LA is required, utilising benchmarking, the evidence-base and innovation / research, applied through quality improvement methodology co-produced with local residents
 - Outline the key enabling strategic plans for workforce, infrastructure (estates and digital), and management of the operational environment (e.g. market management)

SECTION FIVE: The BLMK Approach

The purpose of the Joint Forward Plan is to determine how best we will work in partnership to address these known 'wicked issues' to the benefit of residents; and how these actions will enable sustainable delivery of NHS services to the standards set out in the NHSE Operating Plan.

Addressing these twin challenges will require a systemic and stratified approach, as depicted below:

Based on local JSNAs and Place Plans, the Joint Forward Plan will highlight those areas where a collaborative and different approach is required.

This will shift our focus from ‘what can we afford to do?’ to

‘Can we afford NOT to do it?’

This latter question focuses on the needs and outcomes of the population, and how best we tackle inequalities and improve health outcomes to enable our communities to thrive AND deliver sustainable public sector services within resources.

This innovative and collaborative approach will involve:

- Developing a consistent approach to framing and investigating our ‘wicked issues’, with a focus on defining our target population, supporting co-production and personalisation, using collective resources and focusing on how we apply our different ‘routes to Thrive’.
- Ensuring interventions are evidence based and challenge ourselves to achieve and sustain top decile performance, drawing on and contributing to research and innovation, and applying learning from best practice.
- Taking an adaptive approach to improvement, measuring outcomes as well as activity and considering the impact of our actions/failure to act on health and care (and wider society).

Examples of this approach could include:

a) Earlier intervention for children and young people who would benefit from:

- Speech and language help at a younger age / lower threshold of need
- Autism spectrum disorder support and diagnosis at a lower threshold of need
- Occupational therapy input for children identified above to support communication and social interaction at home and school

The underpinning rationale for this earlier intervention is to support children to meet their earlier developmental and education milestones, rather than delay intervention until the SEND threshold is met later in childhood.

Not only is this better for the individual child but also reduces higher system costs in SEND and (often) mental health support as children become aware of their 'difference' and struggle to keep up at school.

b) Local integrated offer for people with complex mental health and/ or learning disability needs, whose placement needs are currently met through contracting with independent sector providers. This could encompass:

- Creation of sufficient bespoke Supported Independent Living accommodation within Boroughs to meet local need
- Extended capacity to bring crisis support to the individual at times of highest need, reducing Emergency Department attendances / acute psychiatric admission unless clinically required
- Recovery approach that supports the individual to tackle root causes / manage distressing emotions and achieve their potential

This population are some of the most disadvantaged in our society, and this approach sets out a whole-system to tackle these inequalities and support these residents to thrive. This approach is also likely to drive better quality and more financially sustainable support.

c) Elective clinical pathways review

'End-to-end' clinical pathways review typically span the course of the pathway from primary care to secondary (acute) care and the return to primary care for residents who do access healthcare. Adopting a truly end-to-end clinical pathway review could better tackle inequalities and improve health outcomes, as depicted below:

Anchored in Places, this approach will:

- Identify populations whose risk profile / barriers to access indicates they require, using risk stratification at Neighbourhood / ward level
- Provide bespoke engagement (health promotion and uptake of screening programmes)
- Provide oversight for Place partners – giving a clear view (and feedback loop) on managing unwarranted variation not least in:
 - Over-referral that does not convert into increased diagnosis
 - Under-referral / late referral impacting on health outcomes
- Reduce bureaucracy for GPs in referral processes: encouraging greater autonomy for acute providers to determine the right clinical pathway based on diagnostic results
- Inform decision-making on how best to target current under-utilisation of BLMK residents for tertiary (specialised) clinical pathways, including earlier preventative interventions and/ or bespoke local pathways with tertiary providers
- Optimise public health interventions into post-treatment follow-up to maximise health outcomes

The outcomes sought from this approach are two-fold:

1. to ensure timely access that maximises health outcomes for all residents regardless of their barriers to accessing health and care
2. to manage demand and cost through more effective (targeted) interventions based on population need

d) Partnership in Fuller Neighbourhoods to support residents to tackle the root causes of their need (not solely manage symptoms). This approach goes beyond social prescribing to locally-determined offers that:

- Simplifies access to support, reducing the multiplicity of ‘front doors’
- Draws on local communities’ own assets and those of the VCSE to support people to thrive
- Offers co-ordinated support across civic, care and health partners reflecting residents’ needs (not our service configuration and referral processes)

These examples demonstrate how, when we collaborate to the benefit of specific residents, we can improve outcomes for the individual and reduce avoidable cost across the public sector. In this way the plan will aim to move us away from the traditional focus on episodic and siloed care to:

- Define our goals by the needs of our population (at Place) rather than episodes of care or care pathways
- Drive the ‘left shift’, by moving resource to improving prevention and early intervention (to benefit residents and reduce future need and cost)
- Focus our collective attention on where disruptive innovation is required to meet complex need and high demand within resources
- Challenge ourselves to take a long-term view (outcomes & cumulative cost) wherever possible

We will deliver this through Quality Improvement interventions that are locally owned and driven to make it easier for our teams to do the right thing for the resident, first time.

Based on population growth and need we will deploy a range of actions in delivery of the elements of the Joint Forward Plan:

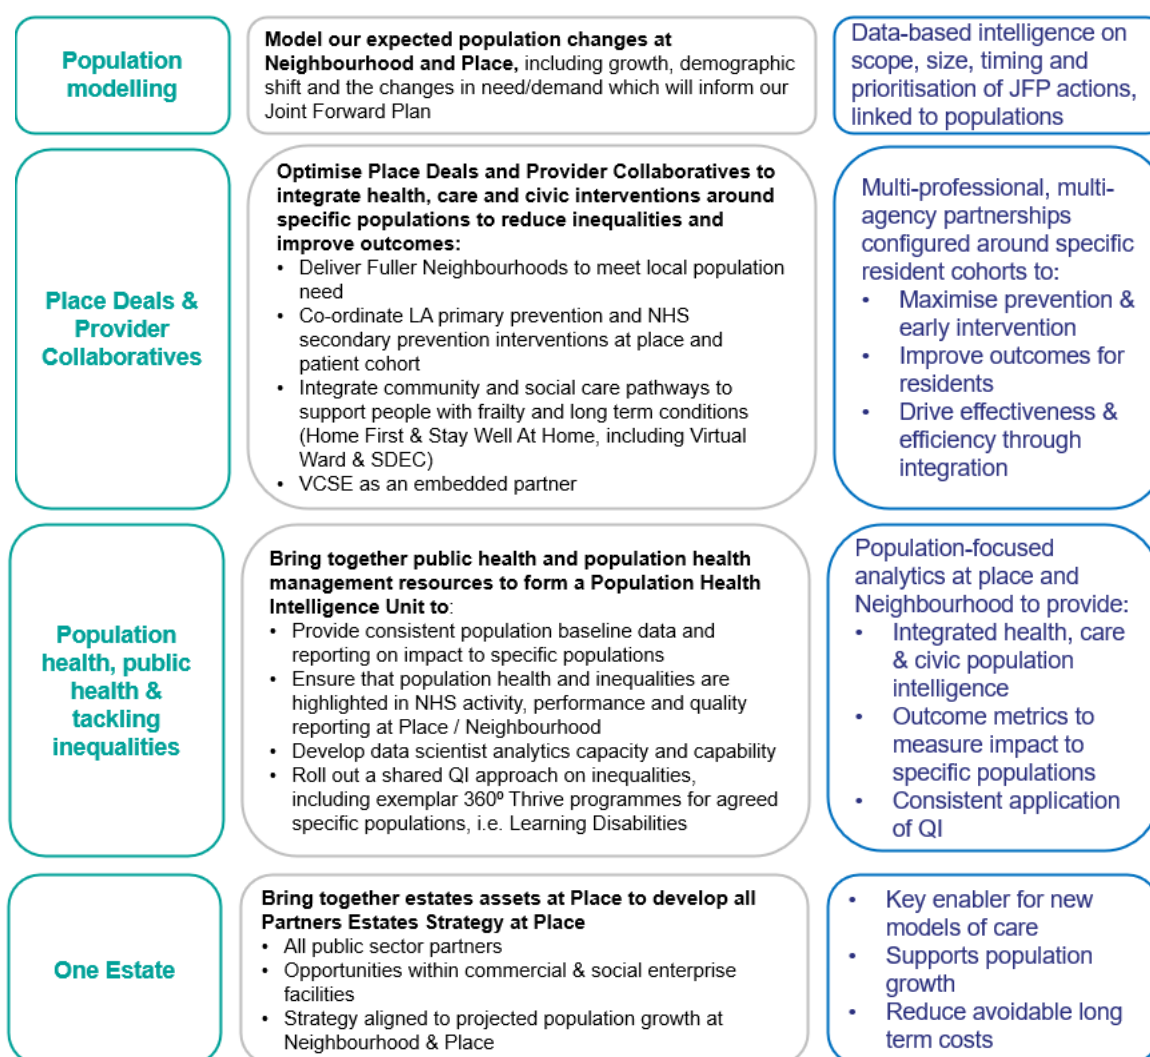

SECTION SIX: preparing the Joint Forward Plan

There will be several phases to the delivery of our Joint Forward Plan

- **Preparation phase** – establishing population-focused intelligence and delivery structures to inform and enable ICB core objectives for residents at neighbourhood and Place.
- Delivery of **Place and Provider Collaborative plans** – to meet local population need sustainably and within resources
- **Delivering the ‘left shift’** – with a consistent focus on high volume/low-cost prevention and low volume/high-cost and complex interventions to maximise impact within resource
- **Building tomorrow** – building prosperity for our communities
- Achieving and **sustaining top decile** – getting ahead of the curve to drive sustainable excellence

Phase 1: Preparation for the Joint Forward Plan July 2022 – March 2024

Establish population-focused intelligence and delivery structures to inform & enable ICB core objectives to residents at Neighbourhood and Place

Phase 2a: Delivery of Place & Provider Collaborative Plans July 2022 – 2040

To meet local population need sustainably within resources

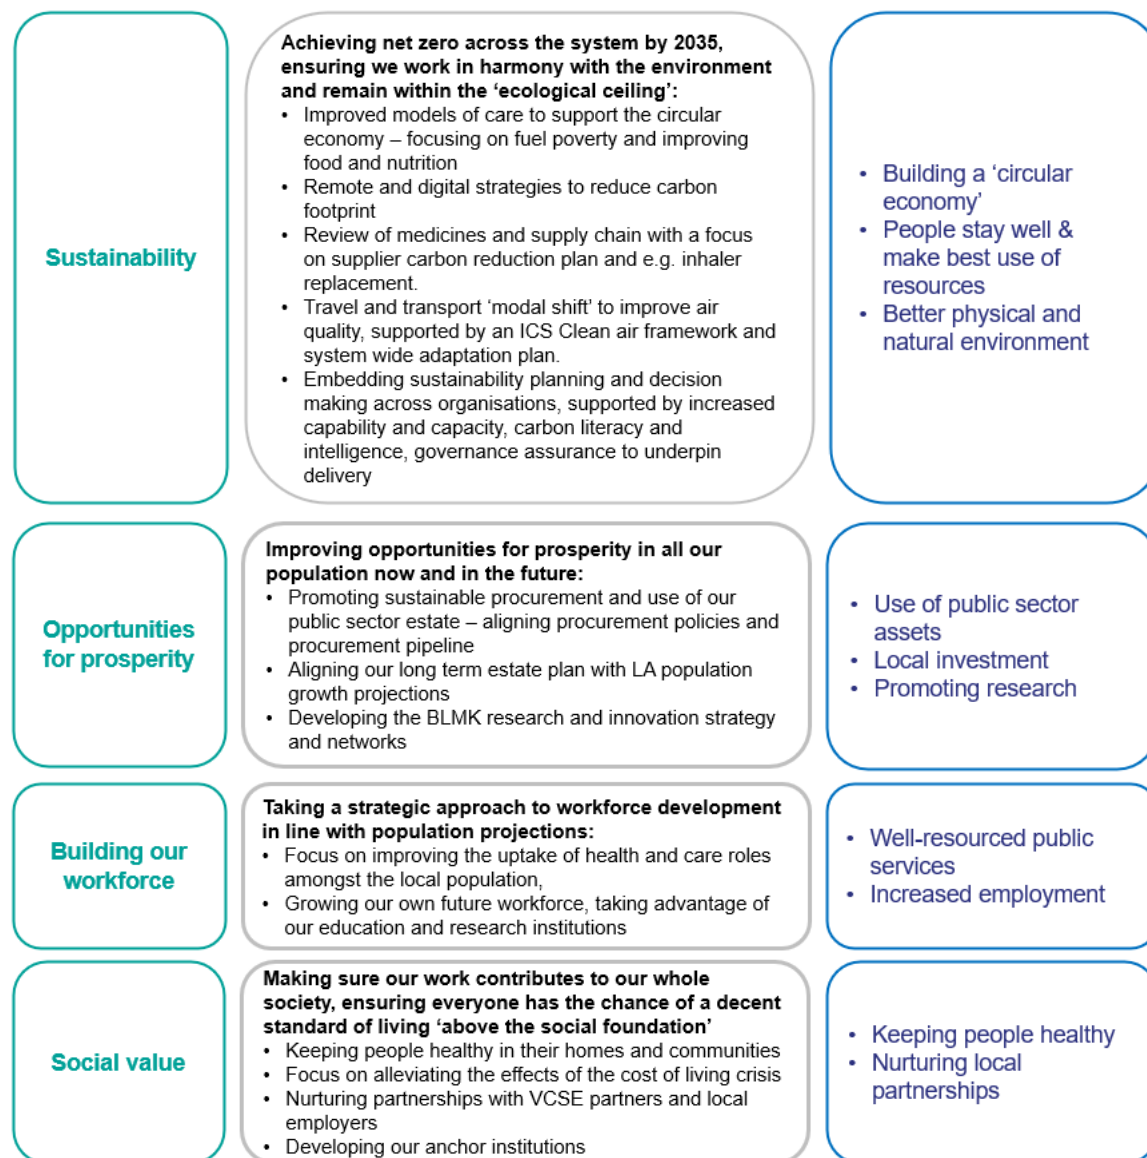

Phase 2b: Delivering the Left Shift April 2024 – March 2040

Consistent focus on high volume/ low-cost prevention AND low volume/ high cost & complexity to maximise impact within resources

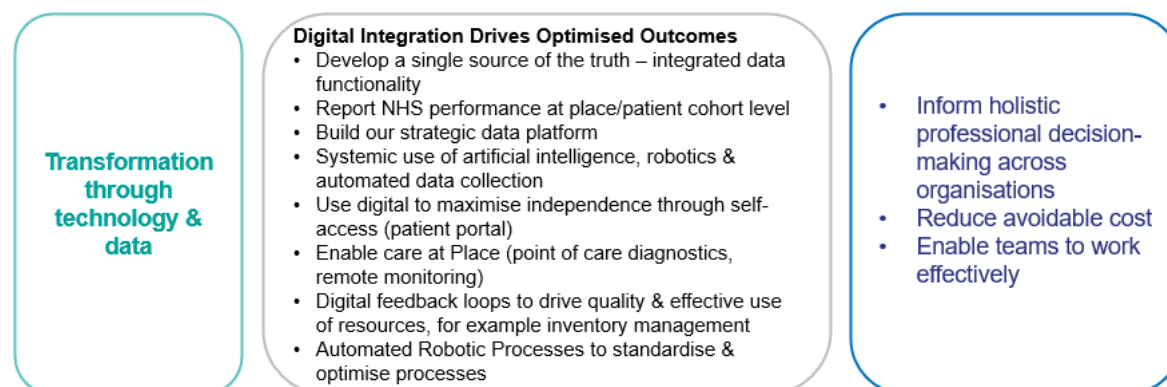

Phase 2c: Building Tomorrow July 2022 – 2040

Building Prosperity for our Communities

Phase 3: Achieving & Sustaining Top Decile July 2022 – 2040

Getting ahead of the curve to drive sustainable excellence

Top Decile Challenge

Benchmarking & Disruptive Innovation Across Partners

- Develop standardised methodology to review clinical speciality pathways end-to-end (including prevention, Left Shift including tertiary NHS care, & secondary prevention)
- Systemic programme of effectiveness and efficiencies on clinical support and operational pathways that span multiple organisations, using professionally determined standardisation & feedback loops, i.e. radiology & pathology order sets (primary & acute), logistics (co-location of services, and patient transport)
- Opportunities to deliver transactional processing (finance, medicines dispensing) at scale through automated processes
- Audit on effectiveness / outcomes (pathway operational processes & patient/ resident outcomes) as part of BAU, enabling teams to flex and innovate to optimise outcomes within sustainable resources

- Improve individual outcomes
- Enable teams to work effectively
- Reduce avoidable long-term cost

SECTION SEVEN: Place and Provider Collaborative Key Objectives

[for completion ahead of Health and Wellbeing Boards]

Each of the four Places in BLMK have been developing Place plans, identifying local priorities that partners can work collectively on to improve the health and wellbeing of local residents.

[Note – text below is place holder only – requires Place partners' engagement to complete – to include wicked medium/long term issues that we need to address in partnership at Place and Provider Collaboratives]

Bedford Borough

Bedford Borough's vision is to thrive as a Place that people are proud of, want to live in and move to. Local plans recognise a growing and strong local economy and an active response to climate change as two important factors in achieving this. From this foundation residents will be able to thrive and realise their potential, supporting and celebrating Bedford Borough's diverse and inclusive communities.

The Bedford Borough Place plan has been developed by the Health and Wellbeing Board and commits to:

- Understanding our communities
- Promoting prevention and health promotion
- Transforming care with primary care and VCSE

The priority partnership actions identified in Bedford Borough are:

- Tackling obesity
- Improving access to primary care

Central Bedfordshire

The Central Bedfordshire Place Plan includes three over-arching ambitions set out below:

- **Promoting fairness and social inclusion** – identifying and tackling underlying inequalities in social and wider determinants of health, promoting better equitable access to services.
- **Living Well** – so everyone has the right and opportunity to live their best life, with the required support and infrastructure to make healthy choices and maximise wellbeing.

- **Ageing well** – to provide support and services required to meet the needs of an ageing population, adapting to changing demands and new models of care.

Given the breadth of the ambition, the board has identified 5 initial priorities of focus which are:

1. **Cancer** – prevention, early detection and reducing premature mortality.
2. **Children and Young People’s Mental Health** – delivering the ambitions to promote positive mental health and wellbeing
3. **Mental health, learning disability and autism** – reducing stigma, improving the experience of care and physical health of people with these conditions and access in crises.
4. **Primary care access, including dentistry** – developing the fuller plan for integrated care and developing new models of care
5. **Developing a one team approach to intermediate care services** – ensuring more joined up and timely care

Luton

By 2040, the vision is for Luton to be a healthy, fair and sustainable town, where everyone can thrive and no-one has to live in poverty, supported by:

- **A town built on fairness** – tackling inequality
- **A child friendly town** – investing in young people
- **A carbon neutral town** – addressing the impact of climate change

The Luton Place Board has developed a Place plan which commits to:

- Giving every child the best start in life
- Sustainable communities, and tackling inequalities
- Reducing frailty and supporting independence

The key priority actions identified to deliver this in Luton are to work in partnership to build:

- **Community hubs** and healthy places
- Improved **mental health services** and interventions to tackle the causes of poor health
- The Luton **digital programme**, connecting health and care services and helping people stay independent at home
- Capacity and capability across the **VCSE sector**

Milton Keynes

The Milton Keynes Health and Care Partnership, has developed and a ‘MK Deal’ which formalises the commitment of the main local NHS partners in MK and the City Council to work more closely together, with a focus on:

- **Improving system flow** – with a focus on urgent and emergency care services for older and/or frail and/or complex service users.
- **Tackling Obesity** – helping people lose weight and maintain a healthy weight through easily accessible weight management programmes, use of technology, pharmacological therapies and education/prevention work.
- **Children & Young People’s Mental Health** – recognising that good mental health in children and young people helps build resilience, develop healthy relationships and lays the foundation for better mental and physical health and wellbeing throughout their whole lives. Early intervention is key for lifelong wellbeing: 75% of adult mental health issues are present by the age of 24.
- **Complex Care** – focussing on improving the planning, assessment, commissioning, and case management for people who have the most complex needs

Bedfordshire Care Alliance

The Bedfordshire Care Alliance is a provider collaborative which aims to ensure that where scale and complexity requires us to standardise care across the three Bedfordshire boroughs.

The Alliance has agreed a focus on four priority areas:

- **Supported discharge** – improving rehab reablement and recovery outcomes
- **Alternatives to acute admission** – stay well at home
- **Digital infrastructure** – to enable integrated pathways of care across Bedfordshire
- Support to Places to optimise **care closer to home**

Mental health, Learning Disabilities and Autism Collaborative

The BLMK Mental Health, Learning Disability and Autism Collaborative is a collaboration of the BLMK ICB, CNWL, ELFT the Bedfordshire Care Alliance, Milton Keynes Health and Care Partnership and Place based partnerships to improve outcomes, quality, value and equity for people in BLMK.

The initial vision of the Collaborative, which will be developed with input from service users, carers and system partners, will put service user voice and a focus on Place at its heart, refocusing efforts on addressing inequalities and unwarranted variation, and working at scale where it makes sense to do so.

Specific areas where the Collaborative will add value will include:

1. **Workforce** – training a new generation of mental health professionals
2. **Emotional wellbeing for young people** – responding to the increase in referrals since the pandemic
3. **Support for adults with autism** – so that even those without a formal diagnosis can get access to the support they need.

SECTION EIGHT: Sustainable delivery of NHS Operating Plan Targets

[to be updated following submission of the 2023/24 Operational plan]

Our approach to planning, transformation and contracting will look to address wicked issues which relate to our ways of working and operational realities, including:

These issues include:

- Vulnerabilities highlighted through winter pressures and the need to promote **admission avoidance and supported discharge** – workforce is a significant issue in this regard.
- **End of life care**, and in particular the need to develop a Place based delivery model
- Long waits in **elective care**, with a focus on ophthalmology, ENT, cardiology and MSK, and links to theatre productivity and vulnerabilities in paediatric surgery provision.
- **Diagnostics** including the development of community diagnostic hubs and refurbishments required to support endoscopy pathways.
- Ongoing pressures on **cancer services** including increased demand and complexity of cancer presentations and impacts on recovery of services, and the need to balance this with a push for early referral and diagnosis of cancer.
- Support for **children and young people** – especially those with the most complex needs, and to improve the experience of transition between services
- Improving uptake of **childhood vaccinations**, improving mental health and tackling obesity in children and young people.
- Recruitment and retention within the **maternity workforce** and addressing inequalities in experience and outcomes for our residents.
- Increased demand across all ages **autism, ASD and ADHD** pathways, and the need to find alternative solutions to the delays in care associated with long waits for formal diagnoses.
- Cost pressures and increased demand on **section 117** services, and variation in access and provision across the system.
- Capacity across **primary and same day urgent care** – including workforce, IT and estates.
- Capacity and capability to develop **multidisciplinary working across primary and secondary care** based around population need.
- An agreed system approach to **prevention** – including long-term sustainable investment – ensuring this is developed in partnership with the VCSE.

[place holder – additional content on known milestones including Community diagnostic centres, MKUH new hospital build, Mount Vernon re-provision to be added ahead of final submission in June]

SECTION NINE: Summary of key risks *[to be expanded for June submission]*

Principle risks, controls and mitigations are detailed in in the ICBs Board Assurance framework.

Key risks which are likely to impact our ability to deliver our Joint Forward Plan are summarised below:

- 1) insufficient capital/CDEL will be available to meet increased population growth/need.
- 2) insufficient impact on population wellbeing of left shift interventions – failure to deliver this will result in unaffordable need and cost
- 3) a gap or delay in resourcing as population growth/need increases
- 4) head space to lead transformation (operational pressures)
- 5) workforce transformation required

[Question - where are we holding/assuring Joint Forward Plan risks at Place and Provider Collaboratives?]

APPENDICIES *[to be added for June submission]*

a) Strategic Workforce Plan

Linked to

- population growth and demographic shift
- planned job creation in Boroughs
- LA and NHS workforce long term needs

b) Estates and capital strategy

c) Digital & Inequalities/ Health Intelligence Strategy

d) Joint sustainability & Green Plan

e) Medium Term Financial Plan

Appendix B – Summary of BLMK Health and Care Partnership and BLMK Integrated Care Board Business March 2023

1. Health and Care Partnership 4 March 2023

- **Joint forward plan** - The plan for the development of the joint forward plan was agreed.
- **Workforce** pressures has been highlighted in a number of reports and an update will be provided at the next meeting on what the system is doing to retain and recruit staff.
- **Place plans, Health and Wellbeing Board updates and Health and Wellbeing Board guidance** –Place plans and the local priorities were presented and key areas of discussion from the Health and Wellbeing Board meetings. Health and Wellbeing Board guidance that was published in November 2022 and the requirements it on the Health and Wellbeing Boards, ICBs and ICPs was noted. [Health and wellbeing boards – guidance - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/publications/health-and-wellbeing-boards-guidance)
- **Delegation of Dentistry, Optometry & Community Pharmacy** – an update on the delegation of responsibility from 1 April 2023 to the ICB of dentistry, optometry and community pharmacy was provided. It was noted that 2023/24 would be a transitional year and provides an opportunity to build relationships with contractors. It was reported that there are significant challenges with the national contracts and partners supported the lobbying for change in contracts to enable more local flexibility. Access to NHS dentists was a real concern for residents and coupled with community pharmacy closures, increases the workload for GPs.
- **Mental Health, Learning Disability and Autism collaboration** – information was shared on the progress that had been made in provision of mental health services since the Mental Health Five Year Forward view was published in 2016 and the investment through the Mental Health Investment Standard. There was an opportunity to have greater collaboration for people with mental health, learning disabilities and autism and the ICB Board had agreed the development of this collaborative. The report contained an update on feedback from engagement that has taken place and what areas of focus service users are identifying.
- **Community Engagement** – a presentation was given on the new approach of pooling partner resources to avoid engagement duplication, agreeing co-production principles and highlighted areas of work e.g. the Denny review.

2. Board of the BLMK ICB – 24 March 2023

- **Resident's Story** – the Board heard from a Milton Keynes resident about their journey to address back pain and the difficulties she faced in gaining appropriate diagnosis and support. There were numerous opportunities cited where the patient was not listened to and where their care was compartmentalised and not joined-up.
- **Integrated musculoskeletal (MSK) and pain service** – the approach to tendering for MSK services across BLMK was supported including the

development of place-based services. Reference was made to the resident's story and how the proposed approach will aim to address the issues raised. A representative is being sought from each local authority in BLMK to work in partnership with the ICB.

- **Fuller programme** – the Board reflected on the useful Board seminar session held on 24 February 2023 with Claire Fuller and committed to support the development of integrated neighbourhood teams.
- **Core20PLUS5 - for Children and Young People** – the Board agreed to adopt a targeted approach to adapting the Core20Plus5 approach to tackling health inequalities in relation to children and young people. The focus of Core20PLUS5 is on five key areas: asthma, diabetes, epilepsy, oral health and mental health.
- **Delegation of Community Pharmacy, Optometry and Dentistry (POD)** – the Board formally approved the transition of the management of these contracts from NHS England to the ICB from 1 April 2023.
- **BLMK Joint Forward Plan (JFP)** – NHS England has asked for draft Joint Forward Plans for each integrated care system (ICS) to be submitted by 31 March 2023 with final plans published by 30 June 2023. The JFP will cover at least a 5-year time horizon explaining how the four core requirements of ICSs and NHS priorities are to be delivered. The Board agreed the approach including how targeted public engagement work about the JFP will be carried out.
- **Financial and Operating Plan 2023/24** – the Board agreed for the final plan to be signed off by the Chief Executive following a meeting of system chief executives on 29 March 2023. The Board discussed bridging the financial gap, addressing capacity issues to achieve the target for elective activity of 109% of pre-Covid levels and plans to manage hospital flow.
- **Board Assurance Framework (BAF)** – the latest iteration of the BAF was presented. The BAF sets out the key system risks which the Board monitors at each of its formal meetings. Currently, the highest three risks (all scoring 20 out of 25) are as follows.
 - Developing suitable workforce
 - System pressure and resilience
 - Population growth

Meeting Title	Trust Board of Directors	Date: 04 May 2023
Report Title	Serious Incident/Incident (SI) report	Agenda Item Number: 8
Lead Director	Dr Ian Reckless, Medical Director and Deputy Chief Executive Kate Jarman, Director of Corporate Affairs and Communications	
Report Author	Tina Worth, Head of Risk & Clinical Governance	

Introduction	Assurance Item		
Key Messages to Note	This report provides a monthly overview of Risk Management processes/systems in relation to serious incidents in the Trust.		
Recommendation <i>(Tick the relevant box(es))</i>	For Information <input checked="" type="checkbox"/>	For Approval <input type="checkbox"/>	For Review <input checked="" type="checkbox"/>

Strategic Objectives Links <i>(Please delete the objectives that are not relevant to the report)</i>	<ol style="list-style-type: none"> 1. <i>Keeping you safe in our hospital</i> 3. <i>Ensuring you get the most effective treatment</i> 4. <i>Giving you access to timely care</i> 7. <i>Spending money well on the care you receive</i>
--	--

Report History	Serious Incident Review Group
Next Steps	Monthly incident/SI overarching issues reporting
Appendices/Attachments	Trends in graphical format

Serious Incident Report March and April 2023 (up to 25/4/23)

There were five new SIs reported on STEIS in March and April 2023. These are briefly summarised in the table below.

Reference	Division	Category
2023/4599	Core Clinical Services	Patient accident (possible safeguarding)
2023/5717	Women's Health	Venous thromboembolism (VTE)
2023/7333	Medicine (Cancer Centre)	Medication incident
2023/7384	Medicine (Ward 19)	Discharge
2023/7385	Core Clinical Services (Imaging)	Medication/medical device

Trends and Linked Improvement Work

- Pressure ulcers (significant focus remains on preventing pressure ulcers, and on identifying pressure ulcers on admission to inform quality improvement work with partners)
- Newborn blood spot (NNB) screening– taken outside required timeframe (potential emergent pattern).
- Same Day Emergency Care (SDEC) pathway with reports of inappropriate patient referrals from the ED.
- Patient falls with no or minor harm.
- Appropriate escalation of deteriorating patient's observations (national early warning scores/NEWS) to enable ongoing assessment and treatment, noting two recent Preventing Future Death (PFDs) from HM Coroner in relation to the management of sepsis. This is the focus of a specific programme of improvement work in ED and a trust-wide focus on sepsis care and management
- Violence and abuse incidents and attempted self-harm for patients attending the ED in mental health crisis (relating to the management of complex patients and capacity in partner organisations, including care-providers)
- Medication incidents relating to omitted or incorrect medications on discharge (low harm).

Shared Learning from Incidents

Learning generated from incidents and during discussions at weekly review meetings is shared via the 'Spotlight on Safety' message in the weekly CEO Newsletter. During March and April 2023, 12 individual learning/reflection/discussion or 'what's trending' points have been shared with the following themes:

- The importance of good-quality safety netting advice when discharging patients home and awaiting test results/further interventions. Patients need to know when to re-present to hospital versus phone their GP for advice, for example.

- The quality and communication of information included in patient discharge summaries. GPs may also need guidance on when to refer a patient into hospital and with what level of urgency, especially in complex cases/specialist areas.
- The importance of checking that patients don't have any belongings that could pose a risk to staff, other patients, and themselves. These could include sharp instruments, alcohol, or large heavy objects.
- Carrying out thorough patient assessments are an everyday part of clinical care. An essential aspect of these assessments are the plans that are made as a result of the information gathered and subsequent tests/investigations.
- The importance of considering all the available options when thinking about the prevention of venous thromboembolism (blood clots often seen in the legs or lungs, e.g. DVT or PE). This would include TED stockings, appropriate blood thinning medications and intermittent pneumatic compression devices (IPCs, also known as Flowtrons).
- During complex scenarios or emergency situations, it is essential that someone in the team is clearly identifiable as the leader and is able to maintain situational awareness, also known as the 'helicopter view' of the situation.
- Even if a patient has been assessed as fit for discharge, it is essential that they have a clinical review, including a full set of observations prior to leaving the hospital. They may have been previously stable and moved to another ward/area to await discharge, however a recent incident has highlighted that a patient's condition can change, and they can deteriorate unnoticed especially when the team caring for them are less familiar with the patient.
- It is possible for 'threat actors'/hackers to clone personal mobile phones, enabling these individuals to access patient identifiable information which had been shared via a work team WhatsApp group. Please be mindful of what is shared via WhatsApp and consider using password protected apps such as Microsoft Outlook and Teams.
- Ensuring that our patients have all the information they need to be fully involved in decisions about their care, including the appropriate prescribing of medications.

Regulation 28 report/PFD

Patient attended MKUH with a likely acute abdomen. He was discharged after assessment but returned 2 days later when he was suffering from sepsis consequent on a previously undiagnosed bowel perforation. He went on to have emergency surgery but went into cardiac arrest immediately prior. He was resuscitated, surgery completed and moved to the Intensive care Unit (ICU), where he later died.

HM Coroner concluded this was an avoidable death and advised that he would be sending a Preventing Future Death (PFD) report detailing fluid and sepsis management in the ED. We are yet to receive the report from the Coroner, however a significant improvement programme on sepsis care and management has commenced.

Introduction of the Patient Safety Incident Response Framework (PSIRF)

PSIRF will replace the current Serious Incident Framework (2015) and represents a significant shift in the way the NHS responds to and learns from patient safety incidents and other safety intelligence. All NHS organisations are mandated to transition over to PSIRF by Autumn 2023.

Progress over the past two months includes:

- Second PSIRF steering group meeting was held on 29th March - TOR developed, Task and finish groups agreed, leads appointed.
- Process mapping of the current incident review process has been completed and mapping how the new process may look has begun. Next session 25th April.
- Sandra Vanreyk from the ICS is providing project management support 3 days a weeks starting from 5th April.
- Changes to roles across clinical governance, patient safety and QI are being discussed in order to facilitate the adoption of PSIRF. This will be subject to a consultation and recruitment plan in due course.
- Meetings in progress with each triumvirate to understand current governance/safety/QI processes, what's working well, and any changes needed.

Key risks and issues:

- Significant Radar system changes necessary to support the implementation of PSIRF.
- No additional resource available to implement and sustain the new framework.
- Data analyst support needed for the triangulation of safety data in order to inform our patient safety incident response plan.
- PSIRF requires an organisational cultural shift to truly embed a 'just culture' and sustainable training (QI, Radar, incident review).

Meeting Title	Trust Board of Directors	Date: May 2023
Report Title	Maternity Assurance Group	Agenda Item Number:
Lead Director	Yvonne Christley, Chief Nurse

Meeting Title	Trust Board of Directors	Date: 04 May 2023
Report Title	2022-23 Executive Summary M12	Agenda Item Number: 10
Lead Director	John Blakesley, Deputy CEO	
Report Author	Information Team	

Introduction	Purpose of the report: Standing Agenda Item
Key Messages to Note	<p>Emergency Department:</p> <ul style="list-style-type: none"> - There were 101,212 ED attendances in 2022/23, above the threshold of 100,638 and averaging 8,434 per month. - ED 4-hour performance increased to 79.1% in March 2023, exceeding both the national performance and the performance of the majority of trusts within our Peer Group. - 80.8% of ambulance handovers took less than 30 minutes in 2022/23. <p>Outpatient Transformation:</p> <ul style="list-style-type: none"> - There were 413,979 outpatient attendances in 2022/23 exceeding the threshold by 6,561 and averaging 34,498 attendances a month. - In 2022/23 16.3% of attendances were attended virtually and 7.2% of patients did not attend their appointment. <p>Elective Recovery:</p> <ul style="list-style-type: none"> - There were 25,568 elective spells in 2022/23, below the threshold by 457 patients. - At the end of the March 2023, 37,619 patients were on an open RTT pathway. Of these: <ul style="list-style-type: none"> o 2,122 patients were waiting over 52 weeks, declining from 2,324 in February 2023. o 20 patients were waiting over 78 weeks. o 0 patients were waiting over 104 weeks. - At the end of the March 2023, 8,216 patients were waiting for a diagnostic test. Of these patients: <ul style="list-style-type: none"> o 84.5% were waiting less than 6 weeks. <p>Inpatients:</p> <ul style="list-style-type: none"> - During 2022/23 overnight bed occupancy was 91.5%, within the threshold of 93%. - In March 2023, overnight bed occupancy was 90.8% and a significant number of beds were unavailable due to: <ul style="list-style-type: none"> o 133 super stranded patients (length of stay 21 days or more). o 50 DTOC patients. o 95 patients not meeting the criteria to reside. <p>Human Resources:</p> <ul style="list-style-type: none"> - In March 2023: <ul style="list-style-type: none"> o Substantive staff turnover declined slightly to 16.4%, however it remains exceeding the threshold of 9.0%. o Agency expenditure declined to 3.9%, within the threshold of 5% for the first time in 2022/23.

	<ul style="list-style-type: none"> ○ Appraisals (excluding doctors) and mandatory training completion rates were better than their targets. <p>Patient Safety:</p> <ul style="list-style-type: none"> - In 2022/23, the following infections were reported: <ul style="list-style-type: none"> ○ E-Coli: 25 ○ C. Difficile: 19 ○ MSSA: 18 ○ Klebsiella Spp.: 15 ○ P. aeruginosa: 5 ○ MRSA: 2 - Further, MRSA, MSSA, E-Coli and C. Difficile all breached their thresholds.

Trust Performance Summary: M12 (March 2023)

1.0 Summary

This report summarises performance in March 2023 against key performance indicators and provides an update on actions to sustain or improve upon Trust and system-wide performance. This commentary is intended only to highlight areas of performance that have changed or are in some way noteworthy. It is important to highlight that due to post-pandemic recovery plans, some local transitional or phased targets have been agreed to measure progress in recovering performance. It should however be noted that NHS Constitutional Targets remain, as highlighted in the table below:

Indicator ID	Indicator Description	Transitional Target	Constitutional Target
4.1a	ED 4 hour target (includes UCS)	90%	95%
4.2	RTT Incomplete Pathways <18 weeks	70%	92%
4.5a	RTT Patients waiting over 52 weeks (Total)	0	0
4.6	Diagnostic Waits <6 weeks	90%	99%

Given the impact of COVID-19, the performance of certain key constitutional NHS targets for March 2023 were directly impacted. To ensure that this impact is reflected, monthly trajectories are in place to ensure that they are reasonable and reflect a realistic level of recovery for the Trust to achieve.

2.0 Key Priorities: Operational Performance Targets

Performance Improvement Trajectories

March 2023 and year-to-date performance against transitional targets and recovery trajectories:

ID	Indicator	DQ Assurance	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
4.1a	ED 4 hour target (includes UCS)		90%	90%	79.1%	79.1%	✘	▲	✘	
4.2	RTT Incomplete Pathways <18 weeks		70%	70%		47.3%	✘	▼		
4.6	Diagnostic Waits <6 weeks		90%	90%		84.5%	✘	▼		
4.9	62 day standard (Quarterly) 		85%	85%		63.7%	✘	▼		

ED performance improved in March 2023, increasing to 79.1% from 75.8% in February 2023. Further, MKUH performance exceeded both the national overall performance of 71.5% and the performance of the majority of other trusts within its Peer Group (see Appendix 1).

The Trust's RTT Incomplete Pathways <18 weeks performance was 47.3% at the end of March 2023. The total volume of open pathways is now at 37,619, increasing from 37,117 in February 2023. The Trust has robust recovery plans in place to support an improvement in RTT performance, while the cancellation of any non-urgent elective activity and treatment for patients on an incomplete RTT pathway is being proactively managed.

Cancer waiting times are reported quarterly, six weeks after the end of a calendar quarter. They are initially published as provisional data and later finalised in line with the NHSE revisions policy.

In Q3 2022/23, the Trust's 62-day standard performance (from receipt of an urgent GP referral for suspected cancer to first treatment) was 63.7% against a national target of 85%, declining from 66.0% in Q2 2022/23. The percentage of patients to begin cancer treatment within 31 days of a decision to treat declined to 94.6%, dropping below the national target of 96%. The percentage of patients to attend an outpatient appointment within two weeks of an urgent GP referral for suspected cancer was 79.7% against a national target of 93%, an improvement when compared to the previous quarter's performance of 73.1%.

3.0 Urgent and Emergency Care

In March 2023, one of the six key performance indicators measured in urgent and emergency care demonstrated a month-on-month improvement:

ID	Indicator	DQ Assurance	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
2.4	Cancelled Ops - On Day	■	1%	1%	1.14%	0.68%	✓	▼	✗	
3.2	Ward Discharges by Midday	■	25%	25%	14.3%	14.8%	✗	▲	✗	
3.4	30 day readmissions	■	7%	7%	6.5%	6.3%	✓	▼	✓	
3.6b	Number of Super Stranded Patients (LOS>=21 Days)	■	50			133	✗	▼		
3.9a	Ambulance Handovers <30 mins (%)	■	95%	95%	80.8%	85.3%	✗	▼	✗	
4.2	RTT Incomplete Pathways <18 weeks	■	70%	70%		47.3%	✗	▼		

Cancelled Operations on the Day

In March 2023, there were 19 operations that were cancelled on the day for non-clinical reasons, representing 0.68% of all planned operations. The majority of the cancellation reasons were related to staff and bed availability.

Readmissions

The Trust's 30-day emergency readmission rate remained below the 7% threshold at 6.3% in March 2023. For the whole of 2022/23, performance was also below the threshold at 6.5%.

Delayed Transfers of Care (DTCO)

The number of DTCO patients reported at midnight on the last Thursday of March 2023 was 50 patients: 41 in Medicine and nine in Surgery. This was a deterioration in performance compared to the last Thursday of February 2023 which saw 45 DTCO patients.

The number of patients not meeting the criteria to reside on the last Thursday of March 2023 was 95: 79 in Medicine and 16 in Surgery. This was a deterioration in performance compared to the last Thursday of February 2023, which saw 75 patients not meeting the criteria to reside.

Length of Stay (Stranded and Super Stranded Patients)

The number of super stranded patients (e.g. with a length of stay of 21 days or more) at the end of the month was 133, a deterioration in performance compared to 122 patients at the end of February 2023.

Ambulance Handovers

In March 2023, the percentage of ambulance handovers to the Emergency Department taking less than 30 minutes was 85.3%, above the 2022/23 monthly average of 81.1%.

4.0 Elective Pathways

ID	Indicator	DQ Assurance	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
3.1	Overnight bed occupancy rate	■	93%	93%	91.5%	90.8%	✓	▲	✓	
4.2	RTT Incomplete Pathways <18 weeks	■	70%	70%		47.3%	✗	▼		
4.4	RTT Total Open Pathways	■	33,998	33,998		37,619	✗	▼		

Overnight Bed Occupancy

Overnight bed occupancy was 90.8% in March 2023, within the 93% threshold.

RTT Incomplete Pathways

The Trust's RTT Incomplete Pathways <18 weeks at the end of March 2023 was 47.3% and the number of patients waiting over 52 weeks was 2,122. These patients were distributed across Surgery (1,892), Women and Children (161), Medicine (67) and Core Clinical (2).

Diagnostic Waits <6 weeks

The Trust did not meet the national standard of fewer than 1% of patients waiting six weeks or more for their diagnostic test at the end of March 2023, with a performance of 84.5%, declining from 86.8% in February 2023. However, recent performance reflects that recovery in this area has been effectively managed throughout the year, given that the starting point in April 2022 was as low as 61.9%.

The Trust has robust recovery plans in place to support improvement in diagnostic performance and demand is being proactively monitored across modalities to ensure that the plans can be managed.

5.0 Patient Safety

Infection Control

In March 2023, the following infections were reported:

Infection	Number of Infections	Division/ Ward
E-Coli	6	Medicine (Ward 8, Ward 17, Ward 19 and 2 x Ward 22) and Women and Children (Ward 9)
Klebsiella Spp bacteraemia	1	Medicine (Ward 8)
C.Diff	1	Medicine (Ward 18)
P.aeruginosa bacteraemia	1	Surgery (Ward 6)
MSSA	0	
MRSA bacteraemia	0	

Note:

- MRSA breached its zero-tolerance threshold for 2022-23 with two occurrences.
- MSSA breached its threshold of eight in 2022-23 with 18 occurrences.
- C.Diff breached its threshold of 10 in 2022-23 with 19 occurrences.
- E-Coli breached its threshold of 15 in 2022-23 with 25 occurrences.

ENDS

Appendix 1: ED Performance - Peer Group Comparison

The following NHS Trusts have historically been considered peers of MKUH:

- Barnsley Hospital NHS Foundation Trust
- Buckinghamshire Healthcare NHS Trust
- Homerton University Hospital NHS Foundation Trust
- Kettering General Hospital NHS Foundation Trust
- Mid Cheshire Hospitals NHS Foundation Trust
- North Middlesex University Hospital NHS Trust
- Northampton General Hospital NHS Trust
- Oxford University Hospitals NHS Foundation Trust
- Southport and Ormskirk Hospital NHS Trust
- The Hillingdon Hospitals NHS Foundation Trust
- The Princess Alexandra Hospital NHS Trust
- The Queen Elizabeth Hospital, King's Lynn, NHS Foundation Trust

Note: In May 2019, fourteen trusts began field testing new A&E performance standards and have not been required to report the number of attendances over 4hrs since then. Kettering General Hospital NHS Foundation Trust and Bedfordshire Hospitals NHS Foundation Trust, both in the MKUH peer group, are two of those and therefore data for these trusts is not published on the [NHS England statistics](https://www.nhs.uk/statistics) website.

January 2023 to March 2023 ED Performance Ranking

MKUH Peer Group Comparison - ED Performance	Jan-23	Feb-23	Mar-23
Homerton Healthcare NHS Foundation Trust	82.9%	74.1%	80.9%
Milton Keynes University Hospital NHS Foundation Trust	80.1%	75.8%	79.1%
Southport and Ormskirk Hospital NHS Trust	75.9%	74.8%	73.7%
Buckinghamshire Healthcare NHS Trust	71.9%	72.8%	70.0%
The Hillingdon Hospitals NHS Foundation Trust	71.9%	63.9%	68.3%
Northampton General Hospital NHS Trust	66.3%	69.2%	66.4%
Oxford University Hospitals NHS Foundation Trust	64.4%	60.5%	64.7%
North Middlesex University Hospital NHS Trust	65.0%	64.8%	63.9%
Barnsley Hospital NHS Foundation Trust	66.1%	60.0%	63.8%
The Queen Elizabeth Hospital, King's Lynn, NHS Foundation Trust	58.3%	59.3%	62.4%
Mid Cheshire Hospitals NHS Foundation Trust	59.4%	61.1%	60.0%
The Princess Alexandra Hospital NHS Trust	54.4%	50.9%	51.6%
Bedfordshire Hospitals NHS Foundation Trust	-	-	-
Kettering General Hospital NHS Foundation Trust	-	-	-

Key: Monthly/Quarterly Change

- ▲ Improvement in monthly / quarterly performance
- ▬ Monthly performance remains constant
- ▼ Deterioration in monthly / quarterly performance
- ⬆ NHS Improvement target (as represented in the ID columns)
- ↗ Reported one month/quarter in arrears

YTD Position

- ✓ Achieving YTD Target
- ▬ Within Agreed Tolerance*
- ✗ Not achieving YTD Target
- ✗ Annual Target breached

* There was a notable increase in the value of Mortality (HSMR) in January 2022 due to the baseline being rebased. Further, from February 2022, the HSMR threshold may change on a monthly basis as we will be using the monthly peer value to compare MKUH performance against.

Data Quality Assurance Definitions

Green	Satisfactory and independently audited (indicator represents an accurate reflection of performance)
Amber	Acceptable levels of assurance but minor areas for improvement identified and potentially independently audited * /No Independent Assurance
Red	Unsatisfactory and potentially significant areas of improvement with/without independent audit

* Independently Audited – refers to an independent audit undertaken by either the Internal Auditor, External Auditors or the Data Quality Audit team.

If the LCL is negative (less than zero) it is set to zero.
 If the UCL is greater than 100% it is set to 100%.

- Performance activity on a rolling 15 months/quarterly
- Average on a rolling 15 months/quarterly
- Lower Control Limit (LCL)
- Upper Control Limit
- Targets/Thresholds/NHSI Trajectories

Meeting Title	Public Board	Date:
Report Title	Finance Paper Month 12 2022-23	Agenda Item Number: 11
Lead Director	Terry Whittle	Director of Finance
Report Authors	Sue Fox Cheryl Williams	Head of Financial Management Head of Financial Control and Capital

Introduction	The Purpose of the report is to provide an update on the financial position of the Trust at Month 12 (March 23).		
Key Messages to Note	<p>The Trust is reporting a £5m deficit (on a Control Total basis) to the end of the financial year, this is £5m worse than plan. There are several underlying adjustments in the month 12 position including adjustments for central pension contributions and the disputed agenda for change wage award. There is a continued pay cost burden from premium agency costs to cover sickness, vacancies, and supernumerary nursing arrangements.</p> <p>The Trust has made significant investment in additional capacity to support elective service backlog recovery. No additional income has been received from NHS England due to a change mid-year in the ERF payment policy.</p> <p>The capital expenditure programme is £0.6m above its revised capital spend position of £30.1m which includes the additional in year national schemes and impact of the IFRS16 leases. EXECUTIVE SUMMARY

(1 & 2.) Revenue – Clinical revenue (BLMK Integrated Care Board block contract and variable non-ICB income) is above plan. Income has been received for the payment of the backdated wage award. Other revenue is above plan due to income received for education and training. The forecast includes release of non-recurrent income to support costs.

(3. & 4.) Operating expenses – Pay costs are higher than plan for several reasons. These include payment of the national wage award (largely offset by in-year funding received), increased costs for temporary agency staff and bank pay enhancements (sickness, vacancies, and supernumerary cover), plus additional pay spend on elective waiting list recovery. Non-pay is above plan due to inflationary cost pressures and additional spend on clinical consumables and outsourcing.

(5.) Non-operating expenditure – Higher than plan due to valuation impairments.

(8.) Elective Recovery Fund – Reported at planned levels to month 12 following informal guidance that baseline plans would be underwritten by NHSE.

(9.) Covid expenditure – Reduced direct Covid costs mainly relating to lower backfill for staff sickness absence.

(11.) Financial Efficiency– There is a shortfall against the in-year and annual savings target (c.69% delivered). The shortfall is mitigated by non-recurrent measures this year but will be a brought forward underlying financial pressure in 23/24.

(12.) Cash – Cash balance is £30.0m, equivalent to 31 days cash to cover operating expenses. Balances include £11.6m for capital schemes.

(13.) Capital – Capital expenditure programmes are above plan; however, the plan does not include the additional funding for nationally approved schemes which includes the CDC, IT, Digital Diagnostics and impact of IFRS16. These changes explain the YTD variances to plan of £11.8m, the additional £0.6m relates to agreed additional capital spend to partly offset an underspend within BLMK ICS.

(14.) ICS Financial Position – The BLMK ICS position will be a £5m deficit (on a control total basis).

Key message

The Trust is reporting a £5m deficit (on a Control Total basis) to the end of the financial year. This is £5m worse than plan. NHS England has agreed the budget overspend at year end.

There are several underlying adjustments in the month 12 position including adjustments for central pension contributions and the disputed agenda for change wage award.

There is a continued pay cost burden from bank rate enhancements and premium agency costs to cover sickness, vacancies, and supernumerary nursing arrangements.

The Trust has made significant investment in additional capacity to support elective service backlog recovery. No additional income has been received due to a change mid-year in the ERF payment policy.

The capital expenditure programme is £0.6m above its revised capital spend position of £30.1m which includes the additional in year national schemes and impact of the IFRS16 leases. The variance relates to agreed additional capital spend to partly offset an underspend within BLMK ICS.

FINANCIAL PERFORMANCE - OVERVIEW MONTH 12

2. Summary Month 12

For the month of March 2023, financial performance (on a Control Total basis) is a £3.5m deficit, this is £4.9m adverse to plan.

3. Clinical Income

Clinical income shows a favourable variance of £10m. This is due to the release of deferred income from the prior year to offset non recurrent costs (winter and recovery related capacity). It also includes an accrual for the agenda for change wage award.

4. Other Income

Other income shows a favourable variance of £11m due to funding received for the central employers' pension contribution. This is offset by an equal and opposite adjustment in pay.

5. Pay

Pay spend is above plan with the payment of enhanced bank rates as well as the unbudgeted element of the pay award. This is mostly offset by additional clinical income. An increased number of escalation areas were also open in February incurring premium agency staffing costs. In March the adjustments made for pension funding and wage awards are also included in the pay costs. Further pay detail is included in Appendices 1 and 4.

6. Non-Pay

Non-pay is above plan due to increased spend on drugs, clinical consumables, and clinical outsourcing. Further detail is included in Appendices 1 and 5.

7. Non-Operating Expenditure

Non-operating expenditure is higher than plan in-month due to capital impairments and dividend payments.

All Figures in £'000	Month 12			Month 12 YTD		
	Plan	Actual	Var	Plan	Actual	Var
Clinical Revenue	26,001	35,517	9,516	307,824	331,114	23,290
Other Revenue	1,565	12,277	10,712	19,169	33,576	14,408
Total Income	27,566	47,793	20,227	326,993	364,691	37,698
Pay	(16,120)	(37,565)	(21,445)	(208,343)	(244,551)	(36,208)
Non Pay	(8,297)	(11,695)	(3,398)	(98,408)	(105,707)	(7,299)
Total Operational Expenditure	(24,417)	(49,261)	(24,843)	(306,752)	(350,258)	(43,507)
EBITDA	3,149	(1,467)	(4,616)	20,241	14,432	(5,809)
Financing & Non-Op. Costs	(1,803)	(2,038)	(234)	(20,241)	(19,421)	820
Control Total Deficit (excl. top ups)	1,346	(3,505)	(4,851)	0	(4,989)	(4,989)
Control Total Deficit (incl. top ups)	1,346	(3,505)	(4,851)	0	(4,989)	(4,989)
Donated income	81	182	101	5,171	182	(4,989)
Depreciation	(48)	(47)	1	(563)	(572)	(9)
Impairments & Rounding	0	(1,918)	(1,918)	0	(1,918)	(1,918)
Reported deficit/surplus	1,379	(5,288)	(6,667)	4,608	(7,297)	(11,905)

Key message

For the month of March 2023, the position on a Control Total basis is a £3.5m deficit, which is worse than plan. The deficit is due to a reduction in the release of deferred income which had been used to offset spend on elective recovery.

FINANCIAL PERFORMANCE - OVERVIEW YTD

8. Summary Year to Date

Cumulative financial performance (April-March) on a Control Total basis is a deficit of £5m. This is worse than plan by £5m. Overspends on pay costs are partly offset by increased clinical income.

9. Clinical Income YTD

Clinical income shows a favourable variance of £23m which is due to income received for the wage award, overperformance on the remaining PbR contracts and deferred income from prior years to offset rising costs. Further detail is included in Appendix 1.

10. Other Income YTD

Other income shows a favourable variance of £9m. This is due to income received for the employer's pension contribution.

11. Pay YTD

Pay spend is above plan by £36m YTD due partly to the payment of the wage award and pension contribution, which is offset by increased clinical income, and partly due to unidentified cost improvements. Spend on temporary staffing costs is also going up with enhanced rates increasing uptake in clinical areas. Further detail is included in Appendices 1 & 4.

12. Non-Pay YTD

Non pay is above plan due to expenditure on clinical supplies and establishment expenses relating to activity and inflationary pressures. Further detail is included in Appendices 1 & 5.

13. Non-Operating Expenditure YTD

Non-operating expenditure is higher than plan YTD due to valuation impairments.

Key message
 Up to March 2023, the position on a Control Total basis is a deficit of £5m. This is worse than plan. Overspends on pay are partially offset by increased clinical income.

Deferred income of £21m has been released to support the break-even plan, this is £11m higher than the planned release for the year.

ACTIVITY PERFORMANCE & ERF

14. The Trust has recognised 100% of the expected ERF income available for the month on the basis that this will not be subject to clawback from NHS England. This is expected to continue in the final quarter of the financial year. The revised budget includes full achievement of the £7.6m of ERF allocated to MKUH which requires achievement of 104% of activity versus 2019-20 baselines.

15. Activity vs Plan (as per CIVICA)

Day case activity-

Day cases have increased since Month 11, remaining above the 22/23 plan and above 21/22 actuals. Day cases are running at 103% of 19/20 actuals against a target of 104%.

Elective Inpatient Activity-

Inpatient activity has also increased slightly since month 11 and is above the 21/22 actuals. Electives are running at 93% of 19/20 actuals against a target of 104%.

Outpatient Activity-

Outpatient activity has decreased since month 11 and is in line with the 22/23 plan. New appointments are 117% of 19/20 actuals against a target of 104%.

Non-Elective Spells-

Non elective activity has increased since month 11 but is lower than the 21/22 actuals but below the 22/23 plan.

A&E activity-

A&E activity has increased since month 11 and is in line with the 22/23 plan.

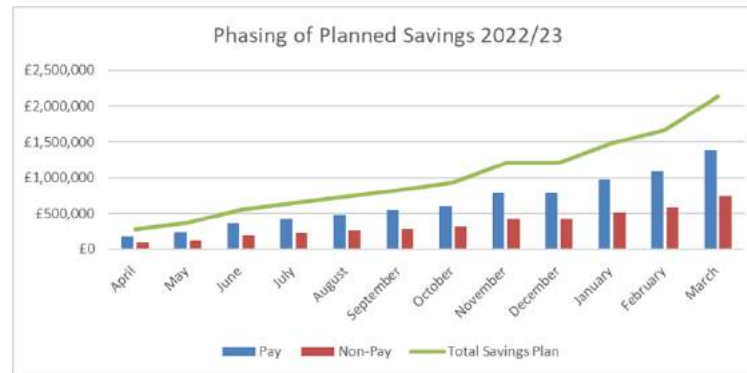

Key message
 Elective and A&E activity increased in March. Non elective activity decreased slightly and remains below plan. ERF income has been recorded at 100% to month 12 following guidance from NHS England that any underperformance will not be subject to clawback. New outpatient appointments are ahead of the 104% target, but electives and day cases are behind the 104% target.

EFFICIENCY SAVINGS

16. The efficiency target is £12m to March 2023 and the schemes that have been signed off are delivering £7m. The remainder of the efficiency target is being achieved through managing the incremental cost of operational pressures bringing total efficiencies to £8.3m.
17. Trust 'Better Value' Programme has identified circa £8.3m (up to Month 12) from schemes against the total plan level of £12m.

Division	Target	Risk			% of target
		Adjusted Plan PYE	Recurrent	Non-recurrent	
	£000's	£000's	£000's	£000's	%
Medicine	3,399	2,612	2,392	220	77%
Surgery	2,709	1,013	903	110	37%
W&C	1,451	1,451	230	1,221	100%
Core Clinical	2,716	1,680	495	1,185	62%
Corporate	1,629	1,515	513	1,001	93%
Central Ops	103	0			0%
Latest position	12,007	8,272	4,534	3,738	69%
			55%	45%	

18. It should be noted that the phasing of the required savings increases during the second half of the financial year. This is shown in the graph below:

Key message

YTD the Trust has delivered its £12m efficiency requirement. This has been achieved through transactional savings schemes, managing the cost of operations within available resources and significant non-recurrent funding. Work is progressing through the Trust 'Better Values' programme to identify opportunities for the new financial year.

CAPITAL - OVERVIEW YTD

19. The YTD spend to the end of March on capital after accounting for donated assets and derecognised assets is £30.1, which includes the £8m additional national funded schemes, £5.5m IFR16 leases funded centrally and an additional spend of £0.6m to support an underspend from within the BLMK ICS CDEL position.
20. The Trust's ICS CDEL allocation is £15.9m and the final approved national funding for the year remained at £8.0m as detailed below. The final revised CDEL allocation for the year is £23.9m.
21. The full breakdown of all funding and sources of application is shown in the table below.

Scheme Subcategory	ICS Approved CDEL Allocation 2022/23	National CDEL Allocation 2022/23

CASH

22. Summary of Cash Flow

The cash balance at the end of March was £30.0m, this was £0.1m higher than the planned figure of £29.9m and an increase on last month's figure of £29.9m. (see opposite).

See appendices 6-8 for the cashflow detail.

23. Cash arrangements 2023/24

The Trust will receive block funding for FY24 which will include an uplift for growth plus any additional incentive funding linked to activity delivery and funding for high-cost drugs on a pass-through basis.

24. Better Payment Practice

The Trust has fallen below the national target of 95% of all bills paid within the target timeframe in terms of value and volume. This is mainly due to the repatriation of SBS AP services, and the ongoing issues with agency invoicing. Both issues are being addressed and action plans are in progress to resolve them. This metric will continue to be monitored in accordance with national guidance and best practice.

Better payment practice code	Actual	Actual	Actual	Actual
	M12	M12	M11	M11
	YTD	YTD	YTD	YTD
	Number	£'000	Number	£'000
Non NHS				
Total bills paid in the year	74,335	190,205	65,870	168,323
Total bills paid within target	62,226	170,583	54,999	150,309
Percentage of bills paid within target	83.7%	89.7%	83.5%	89.3%
NHS				
Total bills paid in the year	1,934	16,849	1,728	6,898
Total bills paid within target	1,464	13,781	1,316	4,390
Percentage of bills paid within target	75.7%	81.8%	76.2%	63.6%
Total				
Total bills paid in the year	76,269	207,054	67,598	175,220
Total bills paid within target	63,690	184,364	56,315	154,699
Percentage of bills paid within target	83.5%	89.0%	83.3%	88.3%

Key message

Cash at the year-end was above plan by £0.1m. The Trust has fallen below the 95% target for BPPC, mainly due to issues experience by SBS during their repatriation of AP services, and ongoing agency invoicing issues. Management is working to rectify payment performance to levels required.

BALANCE SHEET

25. Statement of Financial Position

The statement of financial position is set out in Appendix 9. The key movements include:

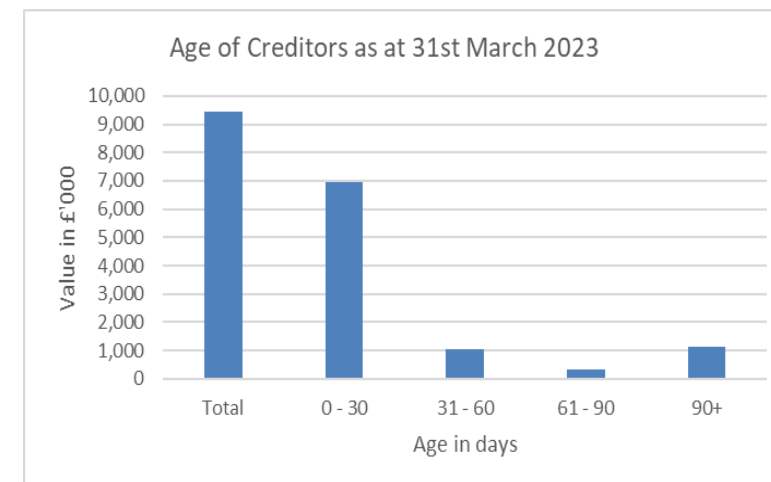

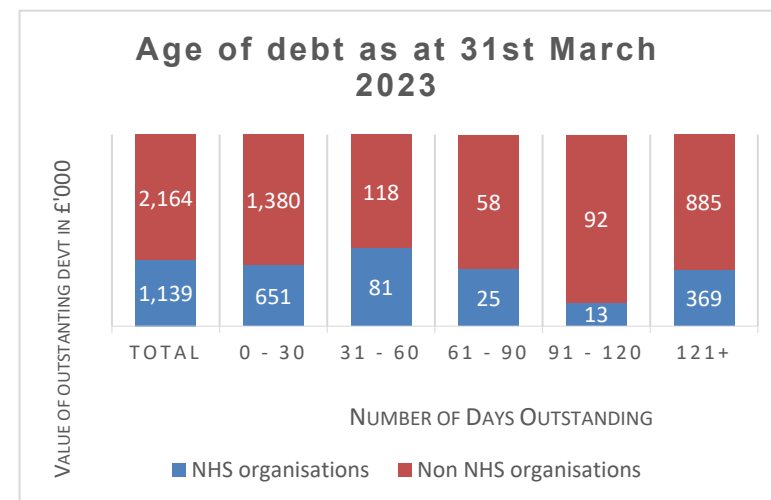

- Non-Current Assets have increased from March 22 by £38.8m; this is mainly driven by the inclusion of Right of Use assets related to the adoption of IFRS 16 1 April 2022 and capital purchases in year offset by in year depreciation.
- Current assets have decreased by £19.4m; this is mainly due to the decrease in cash £28.0m offset by an increase in receivables (£6.3m).
- Current liabilities have decreased by £8.2m; this is mainly due to the decrease in trade payables £8.8m and a £0.4m increase in Provisions.
- Non-Current Liabilities have increased from March 22 by £17.9m; this is due to the inclusion of Right of Use assets (£18.4m) related to the adoption of IFRS 16 1 April 2022.

26. Aged debt

- The debtors position as of March 23 is £3.3m, which is a decrease of £0.4m from the prior month. Of this total £1.2m is over 121 days old; the detail is shown in Appendix 10.
- The three largest NHS debtors are Bedford Hospitals NHS Foundation Trust £0.3m for salary recharges, Oxford University Hospitals NHS Trust £0.3m for salary/renal recharges and CNWL £0.2m non-contract recharges. The largest non-NHS debtors include £0.2m for overseas patient, £0.8m with Medical Property Ltd for utility recharges, £0.2m with University of Buckinghamshire Ltd for utilities recharges and training recharges. Further details of the aged debtors are shown in Appendix 11.

27. Creditors

- The creditors position as of March 23 is £9.4m, which is a decrease of £0.2m from the prior month. Of this, £2.5m is over 30 days with £1.1m approved for payment. The breakdown of creditors is shown in Appendix 12.

Key message

Main movements in year on the statement of financial position are the inclusion of Right of Use Assets related to the adoption of IFRS 16 1 April 22 and the decrease in cash; debtors are in line with prior month but there is an aged debtor of over 121 days of £1.2m that is being closely monitored.

RECOMMENDATIONS TO BOARD

28. Trust Board is asked to note the financial position of the Trust as of 31st March and the proposed actions and risks therein.

GLOSSARY OF TERMS

Abbreviation	Full name	Explanation
A/L	Annual Leave	Impact of staff annual leave
BAU	Business as usual	In the context of capital expenditure, this is the replacement of existing capital assets on a like for like basis.
BPP	Better payment practice	This requires all NHS Organisations to achieve a public sector payment standard for valid invoices to be paid within 30 days of their receipt or the receipt of the goods or services – the target for this is 95%
CBIG	Clinical Board Investment Group	Capital approval meeting overseeing small scale capital schemes including equipment replacement and building work.
CDEL	Capital Departmental Expenditure Limit	Trusts maximum amount of capital expenditure available to be spent for the current year set by Regional NHS team and reviewed every financial year.
CIP	Cost Improvement Programme	Scheme designed to improve efficiency or reduce expenditure
COVID	COVID-19	Costs associated with COVID-19 virus
E&T	Education & Training	
ERF	Elective Recovery Fund	Additional non recurrent funding linked to recovery
HCD	High Cost/Individual Drugs	
NHP	New Hospital Programme	National capital funding for major hospital redevelopments
PDC	Public Dividend Capital	A form of long-term government finance which was initially provided to NHS trusts when they were first formed to enable them to purchase the Trust's assets from the Secretary of State. Public dividend capital (PDC) represents the Department of Health's (DH's) equity interest in defined public assets across the NHS.
R&D	Research & Development	
YTD	Year to date	Cumulative costs for the year
Other frequently used abbreviations		
Accelerator	Accelerator Funding	Additional funding linked to recovery
Block	Block value	Block income value linked to 19/20 values
Top-up	Top up Funding	Additional block income linked to 19/20 values
Covid	COVID Funding	Additional block funding to cover incremental COVID-19 expenditure
Maple Centre	Maple Centre	The initial project name for the Maple Centre was the Pathway Unit - a 23hr ambulatory care facility currently under construction

Meeting Title	Board Report	Date: April 2023
Report Title	Workforce Report – Month 12	Agenda Item Number: 12
Lead Director	Danielle Petch, Director of Workforce	
Report Author	Louise Clayton, Deputy Director of Workforce	

Introduction	Standing Agenda Item		
Key Messages to Note	This report provides a summary of workforce Key Performance Indicators for the previous 12 months up to 31 March 2023 (Month 12) and relevant Workforce and Organisational Development updates to Trust Board.

Employee relations	Number of open disciplinary cases		9	4	4	9	13	14	15	22	26	22	24	23	20	

- 2.1. **Temporary staffing usage** has remained the same for the quarter, with an increase expected for Q1 as additional agency staff were used during the BMA strike in M1. Fill rate for shifts continue to show higher success of fill rate for nights than days.
- 2.2. The Trust's **vacancy rate continues to fall** and is at **7.4%** with improvements across several staff groups. There are now 4142 employees in post in the Trust, which is the highest it has been, with an additional 242 staff in post compared to the same period in the previous year.
- 2.3. **Staff absence** remains around **4.2%** of which 0.1% is due to Covid. There has been an increase in long term absence which is being managed through the HR Business Partners. Occupational Health are running sessions on the Trust induction and MK Managers Way to increase the profile of the service and improve the benefits of early referral to Staff Health and Wellbeing with employees suffering from stress or musculo-skeletal injuries.
- 2.4. The **stability index figure** (defined as *proportion of staff in post at end of period who were in post at beginning of period*) has started to stabilise and improved from M11, currently at 83%. **Staff turnover** continues to make small improvements with a decrease to 16.4%. Retention projects in areas of high turnover continue and the work is being monitored through Workforce Board and Workforce Development and Assurance Committee.
- 2.5. **Time to hire** has further improved and is now at 41 days which is a significant improvement. The additional temporary resource that was used to improve this KPI will be coming to an end at M12.
- 2.6. The number of **open disciplinary cases** has decreased slightly in month, with several hearings being carried out in January. A detailed Employee Relations case report is produced monthly to JCNC and on a quarterly basis for Workforce Board.
- 2.7. **Statutory and mandatory training** compliance is at 94% and **appraisals** compliance remains at 91%. Divisions are addressing any underperformance against these KPIs locally and are asked to create recovery plans against target.
- 2.8. There are **56.2 nursing vacancies** across the Trust, a reduction of 3.6 wte from the previous month. The second 2023 cohort of 20 international nurses arrived in M12. There are currently 66 candidates in the recruitment pipeline.
- 2.9. There are **119 HCSW vacancies** (B2 and B3 and including Maternity Support Workers) across the Trust which is a decrease of 2.9 on the previous month. There are currently 94 candidates in the recruitment pipeline. There remains significant competition for candidates for these roles locally and so alternative recruitment initiatives are being explored.

3. Continuous Improvement, Transformation and Innovation

- 3.1. The new Vacancy Control process will start from M2 to improve financial controls on agency and bank spend and ensure vacancies are reviewed prior to recruitment.
- 3.2. The Learning and Development team have continued to add modules to the Manager's MK Way with a session on writing Business Cases being run in M12.

4. Culture and Staff Engagement

- 4.1. The Trust has run its **WRES** and **WDES data** for 2022/23 which has shown some areas of improvement and also highlighted areas for further work. Action plans for improvements will be developed in Q1 and the full reports uploaded to the Trust internet page for public view by the end of M2.

5. Current Affairs & Hot Topics

- 5.1. The **Apprenticeship Team** have developed additional programmes of development for current staff to deliver an improved offering of apprenticeships, with a focus on Healthcare Scientists, Imaging, Maternity, Physiotherapy and Catering. Chartered Manager apprenticeships have also been offered to the Divisions to improve succession planning for key senior divisional posts.

6. Recommendations

- 6.1. Members are asked to note the report.

Meeting Title	Public Board Meeting	Date: 4th May 2023

Risk Report

1. INTRODUCTION

This report shows the risk profile of the Trust, the aim of providing the Committee with assurance that the Risk Management process is being effectively managed and highlighting key areas of concern.

2. RISK PROFILE

2.1 Overdue Risks

At the time of reporting, there are 51 risks out of 262 risks (19%), that are overdue their review date. This is an increase of 32 risks since the last report.

2.1.2 Risks Overdue Review > 1 month = 12. There were 3 risks >1 month overdue in the last report.

RSK-388 **Risk Register:** Head & Neck / Surgery
Current Risk Score: 15 (Consequence 3, Likelihood 5)

Risk Owner: Jane Grant
Days Overdue: 88 days

RSK-341 **Risk Register:** Corporate Risk Register / Imaging
Current Risk Score: 20 (Consequence 4, Likelihood 5)

Risk Owner: Paula Robinson

2.1.2 Overdue Risks by CSU/Corporate Department = 51

2.2 New Risks = 10

RSK-444 IF disciplinary cases that remain open longer than the 11-week KPI THEN there may be an impact on our employee's mental health and wellbeing.
Risk Register: Workforce **Risk Owner:** Thomas Dunckley
Current Risk Score: 6 (Consequence 3, Likelihood 2)

RSK-445 IF employees are suspended or excluded from work through Disciplinary and MHPS Policies for an extended period of time THEN they may experience a significant deterioration in their mental health.
Risk Register: Workforce **Risk Owner:** Thomas Dunckley
Current Risk Score: 6 (Consequence 3, Likelihood 2)

RSK-446 IF the Resuscitation Team do not have the capacity to deliver mandatory resuscitation training THEN they may not achieve and maintain compliance rates with mandatory training
Risk Register: Workforce **Risk Owner:** Wendy Bellenger
Current Risk Score: 4 (Consequence 4, Likelihood 1)

RSK-447 IF the previous external payroll provider has underperformed in their duties THEN there may be issues with Pension and Pay issues for staff
Risk Register: Workforce **Risk Owner:** Louise Clayton
Current Risk Score: 16 (Consequence 4, Likelihood 4)

RSK-448 IF the GE Voulson E10 obstetric ultrasound machines are more than 5 years old THEN there may be reduced accuracy in imaging and reduction in image quality; ongoing further costing to replace probes and complete maintenance; higher risk of equipment breakdown

Risk Register: Diagnostic & Screening / Core Clinical Services

Risk Owner: Alexandra Godfrey

Current Risk Score: 9 (Consequence 3, Likelihood 3)

RSK-449 IF an investment is not made in Transfusion Practitioner (TP) team staffing THEN there is a risk that essential and mandated transfusion practitioner tasks will be delayed or incomplete

Risk Register: Diagnostic & Screening / Core Clinical Services

Risk Owner: Jessica Dixon

Current Risk Score: 16 (Consequence 4, Likelihood 4)

RSK-453 IF the changing facilities for hydrotherapy and access to the pool are not reorganised THEN – we are less able to monitor patients health should they become unwell; are unable to navigate a hospital trolley to the poolside when dealing with an emergency situation; are unable to maintain the privacy and dignity of patients whilst changing; are unable to provide disabled access for some patients; are unable to provide secure changing facilities and are unable to meet EDI requirements

Risk Register: Therapies / Core Clinical Services

Risk Owner: Celia Hyem-Smith

Current Risk Score: 16 (Consequence 4, Likelihood 4)

Note: A further 3 risks were added to Radar (RSK-450 / RSK-451 / RSK-450), however there were no Risk Assessments and evidence of approval through the appropriate CIG/CSU/Governance meeting. Therefore these have been temporarily closed pending receipt of the above.

2.3 Closed Risks = 0

2.4 Risks for escalation onto the Corporate Risk Register

RSK-444 IF disciplinary cases that remain open longer than the 11-week KPI THEN there may be an impact on our employee's mental health and wellbeing.
Risk Register: Workforce
Current Risk Score: 6 (Consequence 3, Likelihood 2)
Risk Owner: Thomas Dunckley
Escalation Reason: This risk impacts across the whole Trust.

RSK-445 IF employees are suspended or excluded from work through Disciplinary and MHPS Policies for an extended period of time THEN they may experience a significant deterioration in their mental health.
Risk Register: Workforce
Current Risk Score: 6 (Consequence 3, Likelihood 2)
Risk Owner: Thomas Dunckley
Escalation Reason: This risk impacts across the whole Trust.

RSK-446 IF the Resuscitation Team do not have the capacity to deliver mandatory resuscitation training THEN they may not achieve and maintain compliance rates with mandatory training
Risk Register: Workforce
Current Risk Score: 4 (Consequence 4, Likelihood 1)
Risk Owner: Wendy Bellenger
Escalation Reason: This risk impacts across the whole Trust.

RSK-447 IF the previous external payroll provider has underperformed in their duties THEN there may be issues with Pension and Pay issues for staff
Risk Register: Workforce
Current Risk Score: 16 (Consequence 4, Likelihood 4)
Risk Owner: Louise Clayton
Escalation Reason: This risk impacts across the whole Trust.

3. Risks where the Current Risk Score has changed this month:

3.1 Increasing Risks = 4

RSK-202 IF Transformation delivery is not adequately resourced and prioritised and/or schemes are unrealistic and not well planned. THEN There is a risk that the Trust is unable to achieve the required efficiency improvements through the transformation programme

Increase: 16 to 20 **Reason for Increase:** Reason for increase has not been provided on Radar.

RSK-305 If there is insufficient strategic capital funding available. THEN the Trust will be unable to invest in the site to maintain pace with the growth of the Milton Keynes population's demand for hospital services

Increase: 16 to 20 **Reason for Increase:** Reason for increase has not been provided on Radar.

RSK-067 IF there continues to be vacancy gaps for experienced schedulers/patient pathway staff; and staff who do not have the necessary knowledge and skills required to support Ophthalmology (a specialist area) THEN there is the potential for delays, loss of income, lack of continuity to patient pathways, decreased activity and increased complaints.

Increase: 12 to 15 **Reason for Increase:** Risk increased as there are gaps in admin staff and knowledge to support the service.
The level of harm should be increased to 5 due to potential loss of sight for patients.

RSK-182 IF requests for radiology examinations have been placed by staff who are not trained or certified to do so. THEN Imaging Department members of staff could be in breach of IR(ME) R National Regulations and CQC Guidelines for Practise

Increase: 3 to 6 **Reason for Increase:** Awaiting restrictions to be imposed on PACS to prevent anyone non-qualified from requesting.

3.2 Decreasing Risks = 2

RSK-203 IF there are negative impacts on the supply chain following the rising fuel costs and the conflict in Ukraine. THEN there is a risk that the supply of key clinical products may be disrupted

Decrease: 15 to 12 **Reason for Decrease:** Reason for decrease has not been provided on Radar.

RSK-038 IF Covid-19 impacts NHS Trusts through reduction in availability of Pharmacy staff as a result of infections, self-isolation and redirection to assisting with vaccination programs and therefore, Trusts are purchasing more ready-to-administer injections rather than make the doses themselves. With commercial companies have also been affected by staff having to self-isolate, reducing their capacity and ability to meet the increased demand for ready-to-administer products.

Decrease: 6 to 4 **Reason for Decrease:** Pharmacy aseptic unit have increased production capability to off set reduction in commercial company capacity.

4. Risk Management Training Update

The new 'Risk Management, Simply' training programme for managers started during March/April 2023. To date, 44 members of staff have attended the face-to-face training session. There are further sessions scheduled through the rest of the year, so far, a further 42 members of staff have booked onto one of these sessions.

Risk Management Training is being recorded through the Radar Workforce Compliance module and staff will be recommended to attend 3-yearly refresher sessions, as scheduled into the Radar system.

5. RECOMMENDATION

The Committee is asked to review and discuss this paper.

6. DEFINITIONS

- Scope:** Scope will either be Organisation or Region. Risks that are on the Corporate Risk Register are assigned the Organisation scope. Risks that are on the local CSU/Division/Corporate Department Risk Registers are assigned the Region scope.
- Original Score:** **This is the level of risk without any control in place.** If the controls in place are not effective and fail, then this is the level of risk the Trust could potentially face, should the risk occur. The score should be used to support the prioritisation of risk activities. Where two Current Risk Scores are the same, the risk with a higher Original Score should be managed first as it has the potential to cause a higher risk, should the controls fail.
- Current Score:** **This is the level of risk taking into consideration all implemented controls.** This is the level of risk the Trust is currently exposed to if the risk was to occur now. You should also consider how effective your controls are. The Current Score is the key risk score used for prioritising risks. However, if you do not have assurance your controls are effective and/or you have two risks with the same Current Score, you should also consider the Original Score.
- Target Score:** **This is the level of risk that is deemed acceptable, bearing in mind it is not always possible to eliminate risk entirely.** I.e. what is will the level of risk be once all suitable and appropriate controls have been implemented? The Target Score should take into account the Trust Risk Appetite Statement (see the Risk Management Framework) which guides the level of risk the Trust is willing to accepted, based on the type of risk. For example, the Trust has a low-risk appetite to risks that could result in harm (these should be managed to as low as reasonably practicable).
- Risk Appetite:** The Risk Appetite should be reflective of the level of risk the Trust is willing to accept in pursuit of its objectives. Please see further details regarding the Trust Risk Appetite Statement in the Risk Management Framework.
- Risk Response:** Risks that are being managed and are at their Target Risk Score, will be listed as Tolerate. This means that no further action is required, other than ongoing review of the risk. Risks that require further controls to the implemented to bring the score to the Target Risk Score, will be listed as Treat.

RSK-120	29-Oct-2021	IF medical devices are not correctly cleaned/disinfected/decontaminated/sterilised THEN the devices will not be sufficiently cleaned	Marea Lawford	14-Mar-2023	03-Jan-2024	Planned	9	4	4	monitor and increase score should it be required to do so. this is not seen as a likely risk (05-Jan-2023)	The trust has a decontamination policy which states how equipment can be risk assessed to ensure that the correct methods of cleaning are used. This is on the hospital intranet and can be accessed by all staff. The hospital has two departments HSDU and Endoscopy Decontamination both of which are accredited to ISO 13485 and these units process a vast majority of the medical devices used on a patient. Low risk items are usually dealt with on the wards and the Decontamination policy covers this. Any specialist equipment used in wards and departments is identified at the point of purchase using the PPQ to determine what methods of decontamination are required. If this equipment is unsuitable for reprocessing through HSDU or Endo Decon then a individual risk assessment will need to be completed. Guidance on this can be gained from IPCT, the Decontamination Lead, EBME and the Medical equipment manager. A decontamination group meets quarterly and ward managers/HOD's are requested that any items decontaminated on the wards are brought to the attention of the group in order to ensure that the correct methods are being used.(29-Oct-2021)	Low	Tolerate	risk is low and deemed acceptable.	05-Jan-2023
RSK-160	12-Nov-2021	IF the existing Bag Valve Masks (BVM) look similar to the Lung Volume Recruitment (LVR) bags that the department want to introduce as a Physiotherapy treatment modality for airway clearance THEN they could be used in error during resuscitation procedures	Adam Baddeley	09-Feb-2023	07-Apr-2023	Overdue	15	4	4		<ul style="list-style-type: none"> The bag has "not for resuscitation purposes" printed on the bag by the manufacturers and also comes with a yellow "not for resuscitation purposes" tag attached to it. There are clear differences in the two bags appearances - All staff that work in the ward environments will have completed BLS training at least so will be familiar with the BVM equipment. They will have seen and used the BVM in practice during resus training and therefore would know that it has an oxygen reservoir bag and tubing that connects to an oxygen flow meter which an LVR bag does not have. BVM is kept in its packaging hung on the resus trolley. When an LVR bag is provided to a patient it would be kept in their bedside locker in the navy blue drawstring bag it comes from the manufacturer in. The resus trolley is checked daily by ward staff so if the LVR bag mistakenly was put in the resus trolley by nursing staff that would be recognised. All physio staff that would be issuing this equipment out would have specific training before being able to use with patients. The patient would be seen daily by Physio who would recognise if the LVR bag was missing from that patients locker. If an LVR bag was issued to a patient then the nurse involved in that patients care would be informed of the equipment being kept in the patients locker (but not expected to use the equipment with the patient) Once the LVR is not longer being used with the patient we will ensure it is promptly removed from the bedspace and disposed 	Medium	Tolerate	Risk reviewed at Therapies CIG - No change to risk	17-Jan-2020

Report Title	Board Assurance Framework	Agenda Item Number: 14
Lead Director	Kate Jarman, Director of Corporate Affairs and Communication	
Report Author	Kwame Mensa-Bonsu, Trust Secretary	

Introduction	Assurance Report		
Key Messages to Note	<p>The document remain under development and the Committee is asked to review and make recommendations as appropriate.</p> <p>A. Updated Commentary The commentary on cause for Risk 4 (page 15) – related to ‘Insufficient funding to meet the needs of population we serve’ – has been updated (highlighted).</p> <p>B. Revised Risk Score The score for Risk 5 (page 18) – related to the ‘suboptimal head and neck cancer pathway’ – has been revised upwards from 15 to 20 due to a delayed response from OUH to NHSE on the potential way forward and the suboptimal process in terms of collaboration / engagement with MIKUH on the proposed service model.</p> <p>C. New Risk Entry A new risk entry – Risk 6 – (page 20) related to the ‘sufficiency of future NHS funding’ has been added to the BAF.</p>

Report History	Finance and Investment Committee, April 2023
Next Steps	Trust Executive Committees and Board Committees, May 2023
Appendices/Attachments	Board Assurance Framework

The Board Assurance Framework

The Board Assurance Framework (BAF) details the principal risks against the Trust's strategic objectives.

- The BAF forms part of the Trust's risk management framework, which includes the Strategic Risk Register (SRR), Corporate Risk Register (CRR), and divisional and directorate risk registers (down to ward/ department service level).
- Risks are scored using the 5x5 risk matrix, and each risk is assigned a risk appetite and strategy. Definitions can be found summarised below and are detailed in full in the Trust's risk strategy.
- Board sub-Committees are required to rate the level of assurance against each risk reviewed under their terms of reference. There is an assurance rating key included to guide Committees in this work.

Strategic Objectives

1. Keeping you safe in our hospital
2. Improving your experience of care
3. Ensuring you get the most effective treatment
4. Giving you access to timely care
5. Working with partners in MK to improve everyone's health and care
6. Increasing access to clinical research and trials
7. Spending money well on the care you receive
8. Employing the best people to care for you
9. Expanding and improving your environment
10. Innovating and investing in the future of your hospital

Risk treatment strategy: Terminate, treat, tolerate, transfer

Risk appetite: Avoid, minimal, cautious, open, seek, mature

Assurance ratings:

Green	Positive assurance: The Committee is satisfied that there is reliable evidence of the appropriateness of the current risk treatment strategy in addressing the threat/ opportunity. There are no gaps in assurance or controls and the current exposure risk rating is at the target level; or gaps in control and assurance are being addressed.
Amber	Inconclusive assurance: The Committee is not satisfied that there is sufficient evidence to be able to make a judgement as to the appropriateness of the current risk treatment strategy.
Red	Negative assurance: There is sufficient reliable evidence that the current risk treatment strategy is not appropriate to the nature and/or scale of the threat or opportunity.

5X5 Risk Matrix:

		Consequence					
		How severe could the outcomes be if the risk event occurred? →					
		1 Insignificant	2 Minor	3 Significant	4 Major	5 Severe	
Likelihood	What's the chance the of the risk occurring? ↑	5 Almost Certain	5 Medium	10 High	15 Very high	20 Extreme	25 Extreme
	4 Likely	4 Medium	8 Medium	12 High	16 Very high	20 Extreme	
	3 Moderate	3 Low	6 Medium	9 Medium	12 High	15 Very high	
	2 Unlikely	2 Very low	4 Low	6 Medium	8 Medium	10 High	
	1 Rare	1 Very low	2 Very low	3 Low	4 Medium	5 Medium	

Board Assurance Framework 2022-2023

The Board held a dedicated seminar on risk and the BAF in October 2022. This was to embed understanding among new members of the Board on the Trust's risk management processes, and to review the risks on the BAF, as part of a regular review.

In reviewing other Trust BAFs, particularly those recently evaluated through the Care Quality Commission Well Led process, recommendations to split BAF risk into immediate and medium/ long term was made and accepted by the Board to enable more robust management of immediate risk, and support risk horizon scanning.

The product of that seminar was a new set of recommended risks. These are described below. The next step for development is to work through the Committees and Executive to present a full new BAF at the January 2023 Trust Executive Group and public Board.

Next Six to 12 Month Risk Profile (2023)

The feedback from the three Board risk seminar groups (shown below) has been distilled into five key risks against the achievement of the Trust's strategic objectives in the immediate term. These are as follows:

1. **Insufficient staffing to maintain safety**
2. **Patients experience poor care or avoidable harm due to delays in planned care**
3. **Patients experience poor care or avoidable harm due to inability to manage emergency demand**
4. **Insufficient funding to meet the needs of the population we serve**
5. **Suboptimal head and neck cancer pathway**

Group feedback (six-month to 12-month risk profile):

Group 1	Group 2	Group 3
<ul style="list-style-type: none"> • Staffing and capacity to meet demand • Care assurance consistency under pressure • Managing demand • Environmental conditions • Potential strike action 	<ul style="list-style-type: none"> • Strike action • Covid • Emergency experience linked to waiting times and actual experience • General staffing • Winter capacity 	<ul style="list-style-type: none"> • Shortage of clinical staff • Strikes • Cost of living crisis • Avoidable harm due to delays • Maternity - external perspective of services • Service provision failings due to capacity and staffing

Six-Month to 12-Month Risk Profile

		Consequence

RISK 1: Insufficient staffing levels to maintain safety

Strategic Objectives

1. **Keeping you safe in our hospital**
2. Improving your experience of care
3. Ensuring you get the most effective treatment
4. Giving you access to timely care
5. Working with partners in MK to improve everyone's health and care
6. Increasing access to clinical research and trials
7. Spending money well on the care you receive
8. **Employing the best people to care for you**
9. Expanding and improving your environment
10. Innovating and investing in the future of your hospital

Strategic Risk	If staffing levels are insufficient in one or more ward or department, then patient care may be compromised, leading to an increased risk of harm

RISK 5: Suboptimal head and neck cancer pathway

Strategic Objectives

1. Keeping you safe in our hospital
2. Improving your experience of care
3. Ensuring you get the most effective treatment
4. Giving you access to timely care
5. Working with partners in MK to improve everyone's health and care
6. Increasing access to clinical research and trials
7. Spending money well on the care you receive
8. Employing the best people to care for you
9. Expanding and improving your environment
10. Innovating and investing in the future of your hospital

Strategic Risk	If the pathway for patients requiring head and neck cancer services is not improved, then users of MKUH services will continue to face disjointed care, leading to unacceptably long delays for treatment and the risk of poor clinical outcomes

APPENDIX 1

Board Performance Report: M12 (March 2023)

OBJECTIVE 1 – PATIENT SAFETY

March 2023 and YTD performance against targets and thresholds:

OBJECTIVE 1 - PATIENT SAFETY									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
1.1	Mortality - (HSMR) *	102.1	102.1		108.7	✗	🟡		
1.2	Mortality - (SHMI)	100.0	100.0		106.7	✗	🟢		
1.6	Falls with harm (per 1,000 bed days)	0.12	0.12	0.15	0.07	✔	🟢	✗	
1.13	Pressure Ulcers Classification - Total Category 2, 3, 4, DTI and Unstageable (per 1,000 bed days)	TBC	TBC	2.60	2.02	Not Available	🟢	Not Available	

Key Points

- **HSMR:** The mortality report for March 2023 was not provided, therefore the actual month figure of 108.7 is for February 2023.
- **SHMI:** SHMI improved slightly in March 2023, decreasing to 106.7 from 107.4 in February 2023.
- **Falls:** One fall with moderate harm occurred in March 2023, in Medicine.
- **Pressure Ulcers:** There were 31 category 2, 3, 4, DTI and Unstageable pressure ulcers in March 2023; 23 in Medicine and eight in Surgery.

Board Performance Report: M12 (March 2023)

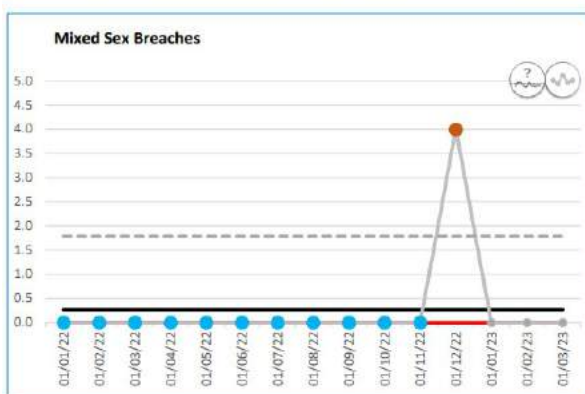

OBJECTIVE 2 – PATIENT EXPERIENCE

March 2023 and YTD performance against targets and thresholds:

OBJECTIVE 2 - PATIENT EXPERIENCE									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
2.3	Complaints response in agreed time	90%	90%	91.5%	78.7%	✗	▼	✓	
2.4	Cancelled Ops - On Day	1%	1%	1.14%	0.68%	✓	▼	✗	
2.5	Over 75s Ward Moves at Night	1,500	1,500	1,652	116	✓	▼	✗	
2.6	Mixed Sex Breaches	0	0	4	0	✓	▬	✗	

Key Points

- Complaints response in agreed time:** Of the 94 complaints received in February 2023, 74 were responded to within the agreed timeframe.
- Cancelled on the Day Operations:** In March 2023, there were 19 operations that were cancelled on the day for non-clinical reasons, representing 0.68% of all planned operations. The majority of the cancellation reasons were related to staff and bed availability.
- Over 75s Ward Moves at Night:** There were 116 over 75s ward moves at night in March 2023; 104 in Medicine and 12 in Surgery.
- Mixed Sex Breaches:** There were zero mixed sex breaches in March 2023. All four breaches during 2022/23 occurred in December 2022.

Board Performance Report: M12 (March 2023)

OBJECTIVE 3 – CLINICAL EFFECTIVENESS

March 2023 and YTD performance against transitional targets and recovery trajectories:

OBJECTIVE 3 - CLINICAL EFFECTIVENESS									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
3.1	Overnight bed occupancy rate	93%	93%	91.5%	90.8%	✓	▲	✓	
3.5	Patients not meeting Criteria to Reside	TBC			95	Not Available	▼		
3.6b	Number of Super Stranded Patients (LOS>=21 Days)	50			133	✗	▼		
3.7	Delayed Transfers of Care	25			50	✗	▼		
3.9a	Ambulance Handovers <30 mins (%)	95%	95%	80.8%	85.3%	✗	▼	✗	

Key Points

- Bed Occupancy:** Overnight bed occupancy was 90.8%, within the threshold of 93%. A significant number of beds were unavailable due to:
 - 133 super stranded patients (length of stay 21 days or more).
 - 50 DTOC patients.
 - 95 patients not meeting the criteria to reside.
- Ambulance Handovers:** 85.3% of ambulance handovers took less than 30 minutes, above the 2022/23 monthly average (81.1%).

Board Performance Report: M12 (March 2023)

OBJECTIVE 4 - KEY TARGETS

March 2023 and YTD performance against transitional targets and recovery trajectories:

OBJECTIVE 4 - KEY TARGETS									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
4.1a	ED 4 hour target (includes UCS)	90%	90%	79.1%	79.1%	✗	▲	✗	
4.5a	RTT Patients waiting over 52 weeks (Total)	0	0		2122	✗	▲		
4.6	Diagnostic Waits <6 weeks	90%	90%		84.5%	✗	▼		
4.7	All 2 week wait all cancers (Quarterly)	93%	93%		79.7%	✗	▲		
4.9	62 day standard (Quarterly)	85%	85%		63.7%	✗	▼		

Key Points

- **ED:** ED 4-hour performance increased to 79.1%, exceeding both the national performance and the performance of the majority of trusts within our Peer Group.
- **RTT:** 37,619 patients were on an open RTT pathway. Of these:
 - 2,122 patients were waiting over 52 weeks, declining from 2,324 in February 2023.
 - 20 patients were waiting over 78 weeks.
 - 0 patients were waiting over 104 weeks.
- **Diagnostics:** 8,216 patients were waiting for a diagnostic test. Of which:
 - 84.5% were waiting less than 6 weeks.
- **Cancer:**
 - 62-day standard performance in Q3 was 63.7% against a national target of 85%, a deterioration when compared to Q2's performance of 66.0%.
 - 79.7% of patients attended an outpatient appointment within two weeks of an urgent GP referral for suspected cancer, an improvement when compared to Q2's performance of 73.1%.

Board Performance Report: M12 (March 2023)

OBJECTIVE 5 - SUSTAINABILITY

March 2023 and YTD performance against transitional targets and recovery trajectories:

OBJECTIVE 5 - SUSTAINABILITY									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
5.1	GP Referrals Received	Not Available		88,851	7,100	Not Available	▲	Not Available	
5.2	A&E Attendances	100,638	100,638	101,212	8,342	✓	▲	✗	
5.6	Outpatient DNA Rate	6%	6%	7.2%	6.9%	✗	▼	✗	
5.8	Elective Spells (% of 2019/20 performance)	110%	110%	103.0%	142.0%	✓	▲	✗	
5.9	OP Attendances (% of 2019/20 performance)	104%	104%	108.2%	132.3%	✓	▲	✓	

Key Points

- **GP Referrals:** 7,100 GP referrals were received in March 2023, below the 2022/23 monthly average of 7,404.
- **A&E Attendances:** There were 8,342 A&E attendances in March 2023, a significant increase from 7,380 in February 2023.
- **Outpatients:**
 - There were 37,343 outpatient attendances, an increase in comparison to March 2020.
 - 6.9% of patients did not attend their appointment, below the 2022/23 monthly average (7.2%).

Elective Spells: There were 2,183 elective spells, an increase in comparison to March 2020.

Board Performance Report: M12 (March 2023)

OBJECTIVE 7 - FINANCIAL PERFORMANCE

March 2023 and YTD performance against transitional targets and recovery trajectories:

OBJECTIVE 7 - FINANCIAL PERFORMANCE									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
7.1	Income £'000	332,163	332,163	369,671	52,774	✓	▲	✓	
7.5	I&E Total £'000	(0)	(0)	(108)	1,377	✓	▲	✗	
7.6	Cash Balance £'000		36,417		29,995	✗	▲		
7.7	Savings Delivered £'000	12,049	12,049	12,050	2,133	✓	▲	✓	
7.8	Capital Expenditure £'000	(18,288)	(18,288)	(29,330)	(8,401)	✗	▼	✗	

Key Points

- Income:
- I&E Total:
- Cash Balance:
- Savings Delivered: Savings delivered (£'000) reached a year to date high in March 2023 with 2,133.
- Capital Expenditure:

Board Performance Report: M12 (March 2023)

OBJECTIVE 8 - WORKFORCE PERFORMANCE

March 2023 and YTD performance against transitional targets and recovery trajectories:

OBJECTIVE 8 - WORKFORCE PERFORMANCE									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
8.1	Staff Vacancies % of establishment	10.0%	10.0%		7.4%	✓	▲		
8.2	Agency Expenditure %	5.0%	5.0%	6.0%	3.9%	✓	▲	✗	
8.3	Staff Sickness % - Days Lost (Rolling 12 months)	5.5%	5.5%		4.9%	✓	▲		
8.5	Statutory Mandatory training	90%	90%		94.0%	✓	▲		
8.6	Substantive Staff Turnover	9.0%	9.0%		16.4%	✗	▲		

Key Points

- Staff Vacancies:** Staff vacancies have continued to reduce and are at their lowest point for the year. Significant recruitment activity across the Trust, but specifically Health Care Support Workers, has contributed to this, in addition to the international recruitment campaigns for nursing that are ongoing.
- Agency Expenditure:** Agency expenditure has improved significantly in month, most likely due to the cessation of the majority of longline agency bookings from 1/3/23. There is likely to be an increase in M1 as usage increased during the period of industrial action.
- Staff Sickness:** Staff sickness continues to reduce with an improvement in long term absence rates across the divisions.
- Statutory Mandatory Training:** Statutory and mandatory training remains above the threshold with improvements in month.
- Substantive Staff Turnover:** Turnover continues to improve following high attrition in the past year, which is a national trend across the NHS. Retention initiatives and action plans within key departments is starting to have an impact on turnover and vacancy rates.

Board Performance Report: M12 (March 2023)

OBJECTIVE O - OTHER

March 2023 and YTD performance against transitional targets and recovery trajectories:

OBJECTIVES - OTHER									
ID	Indicator	Threshold 2022-23	Month/YTD Threshold	Actual YTD	Actual Month	Month Perf.	Month Change	YTD Position	Rolling 15 months data
O.1	Total Number of NICE Breaches	8	8		35	✗	🟡		
O.2	Rebooked cancelled OPs - 28 day rule	90%	90%	77.7%	73.3%	✗	🔴	✗	
O.4	Overdue Incidents >1 month	TBC	TBC		265	Not Available	🟢		
O.5	Serious Incidents	75	75	88	2	✓	🔴	✗	

Key Points

- **NICE Breaches:** NICE breaches remained at 35 in March 2023, the highest number in 2022/23 and a large increase since April 2022 (three breaches).
- **Rebooked Cancelled Ops within 28 Days:** Of the 15 operations cancelled on the day due to non-clinical reasons in February 2023, 73.3% were rebooked within 28 days.
- **Overdue Incidents > 1 month:** There were 265 overdue incidents greater than 1 month in March 2023.
- **Serious Incidents:** There were two serious incidents recorded in March 2023: one under Core Clinical and one under Women & Children.
